U.S. Warns of Backlash To Stymied Trade Talks

By Axel Krause

International Herald Tribune PARIS — William E. Brock, the U.S. trade representative, warned Wednesday that if his country's main trading partners do not agree to start negotiations on liberalizing trade early in 1986, it could trigger protectionist measures in Congress.

He said that, in the absence of an agreement, the Reagan administration would be forced to start negotiations with any government that wanted to participate.

"We will be in negotiation next year with whoever wants to participate," Mr. Brock said, adding that the administration would move ahead with other U.S. trading partners on "a bilateral, or some other, expanded basis."

Mr. Brock's renewed call for the negotiations, made at a meeting of businessmen in Paris, was expected to be one of several issues on the agenda of the annual two-day ministerial meeting of the Organization for Economic Cooperation and Deelopment, which begins Thursday in Paris. Attending will be officials from the agency's 24 member coun-

tries, including Mr. Brock. He said preparations for the meeting were continuing and that he hoped negotiations would begin

Donald T. Regan, the White House chief of staff said that the groundwork and an agenda would have to be completed before President Reagan would meet Mr. Gor-bachev, The New York Times reported from Santa Barbara, His statements were similar in

tone to Mr. Reagan's long-held view of summit meetings with the Soviet Union, a view that the president had appeared to be moving away from after he sent the Soviet leader a letter last month proposing a meeting. After Vice President George Bush delivered the letter, White House officials suggested

U.S. to Consider **Aiding Guerrillas** In Cambodia

By Bernard Gwertzman New York Tunes Service

WASHINGTON --- The Reagan idministration, in a policy shift, has declared that it would no longer rule out supplying U.S. military assistance to the two non-Communist Cambodian guerrilla groups.

The new policy, which was expected to be discussed by Secretary of State George P. Shultz with leaders of the two guerrilla groups Wednesday, marks a departure from the hands-off U.S. military policy toward Indochina.

A State Department official, in an authorized statement, said Tuesday that although the administra-tion felt the Cambodian insurgents now had sufficient arms, "we do not think it is wise to forgo having flexibility on this point should cirrumstances change."

Another State Department official said: "We are not ruling military aid out if it would be the difference in enabling the resistance to sustain itself. But there is no indication that we are close to that point now."

State Department officials add-ed that the United States still believed that primary aid for the insurgents should come from others.

Since President Ronald Reagan took office in 1981, the administration has repeatedly rejected appeals for military aid from Son Sann and Prince Norodom Sihanouk, the leaders of the two non-Communist guerrilla groups.

But last Wednesday, the House Foreign Affairs Committee, by a vote of 24 to 9, approved a \$5-million authorization to the two groups as part of the overall \$14.5billion foreign-aid bill for the 1986 fiscal year. The money would be funneled to the Cambodian groups by Thailand. The bill must pass the full House and Senate and have a matching appropriations grant.

In response to what administration officials called a new mood in Congress in favor of military aid to the non-Communist insurgents, and its own declared policy of aid to insurgents in Nicaragua and Af-ghanistan, the administration altered its policy.

There are three Cambodian groups in opposition to the Vietnamese occupation of Cambodia and to the government in Phnom Penh set up by the Vietnamese after their invasion in 1978.

The most prominent and best trained is the Khmer Rouge, led by Pol Pot, the former Communist leader of Cambodia. Pol Pot has been accused of being responsible for the deaths of more than two million Cambodians from 1975 until the Khmer Rouge were forced into guerrilla warfare in 1978. The Khmer Rouge, said to number 35,000 men, receives its military aid from China.

The second-largest group is the Khmer People's National Liberation Front, led by Son Sann, which has 17,000 guerrillas. The third group is led by the former Cambodian chief of state, Prince Norodom Sihanouk, and has 8,000 rebel soldiers.

The Son Sann and Sihanouk groups have both received aid from China, Thailand and Singapore, but less than that given to the Khmer Rouge.

Son Sann and Prince Sihanouk's son, Prince Norodom Ranariddh, arrived in Washington on Monday and held talks at the State Department on Tuesday. They were to meet with Mr. Shultz on Wednes-

The administration had previously opposed giving military aid to the Son Sann and Sihanouk forces on several grounds, State Department officials said.

One was a belief that neither of those groups was able to fight well and, if given arms, would likely be destroyed by the Vietnamese.

Another factor, officials said, was that members of the Association of Southeast Asian Nations were taking the lead in Indochina and that it would be wrong for the United States to become directly involved in military aid, since it could weaken support for the Cambodian resistance in Third World countries and make it into a Vietnamese-American issue, rather

than a Vietnamese-ASEAN one. The ASEAN members are Indoesia, the Philippines, Singapore, Malaysia, Thailand and Brunei. A third factor, officials said, was

that Congress was deemed unlikely to want to resume military aid to Indochina, given its refusal of additional aid to South Vietnam and (Continued on Page 2, Col. 4)

Secret Study Says Poles View Regime as Inept

By Robert Gillette

Los Angeles Times Service
WARSAW — An internal study by the Polish government says that after nearly four years in power, General Wojciech Jaruzelski's regime suffers from poor credibility and an image of ineptness, in the eyes of the public, which perceives a lack of clarity in its policies, and that it faces political "dangers" from virtually every sector of Polish society.

The study contends that organized opposition by the outlawed Solidarity trade union and other groups is weakening and that Soli-darity is now "fighting for its exis-tence," although it still poses myriad threats to the regime.

But the report portrays the Roman Catholic Church and Poland's independent-minded artistic and academic communities as riddled with committed opponents who are fomenting "ideological and political chaos" throughout the country. It says church-state relations should be "reassessed" and calls for the use of financial pressure on intellectuals to compel their obedi-

ence to the state.
In addition, both the new official trade unions and a broad-based political organization named the Pa-

triotic Front for National Rebirth, which the government set up in 1981 as a channel of communication between state and society, are said to be in danger of stagnation because neither the public nor large elements of the state bureaucracy take them sufficiently seriously.

The 25-page report, "Dangers in the Social-Political Sphere in 1985," was stamped "Confiden-tial." It was issued in numbered copies for discussion at the March 22 meeting of the Council of Ministers, the Polish cabinet. A copy was obtained by the Los Angeles

The report enumerates a discouraging list of perceived threats to the regime's efforts to expand its influence over Polish society, from wayward youth and resentful workers to anti-Communist clerics and intellectuals to subversive foreign radio stations that feed the nation's discontent. Not least among the regime's problems, the report says, is a lack of clarity, and sometimes reality, in its own pronouncements.

Singling out credibility as the major hurdle, the report blames the "insufficient growth of confidence in the regime and its credibility" on what it calls the "relatively low" (Continued on Page 2, Col. 3)

from President Ronald Reagan.

A Monopoly on National Security Despite U.S. Probe, Arms Maker Won More Contracts

By Michael Weisskopf

Washington Post Service WASHINGTON - During the eight months that the Pentagon has

been investigating charges of cor-rupt practices by General Dynamics Corp., it has awarded \$5 billion in business to the weapons manu-That apparently contradictory practice illustrates the limits of any

Pentagon effort to discipline a contractor that holds exclusive contracts to produce strategically important military equipment.

Pentagon officials said they have little choice but to deal with Gener-

al Dynamics, despite charges that it has improperly billed the government for a range of expenses, in-cluding kennel fees for an executive's dog. As the largest U.S. military contractor, General Dynamics is the only supplier of such mainstays of the U.S. arsenal as the Trident nuclear submarine, the F-16 fighter and the M-1 tank. Critics contend that the fault is

the Pentagon's because it allows nopoly suppliers of weapons air force. emed vital to national security. General Dynamics has a stran-

tract procedures are observed when al military work. it totally relies on the company for weapons that are necessary for na-tional defense. There appears to be oversight and investigations sub-

literally no government control. Two recent Defense Department moves underline the difficulty of reining in powerful contractors:

 Last week, the Pentagon an-nounced plans to recover \$124 million in excess overhead payments made to General Dynamics in the past 12 years. Company officials had acknowledged improperly billing the government for liquor. country club dues, a chili cooking contest, personal travel and entertainment.

 In the month that it took auditors to uncover the overpayments, however, General Dynamics won \$544 million in new military work.

On March 28, the Pentagon banned General Electric Co. from obtaining new military contracts pending resolution of an indict-ment charging it with filing false claims for labor payments on a mismajor arms makers to become mo-sile warhead commissioned by the

SAN FRANCISCO - After living 35 years in the same North Beach apartment, Frances Brandolino and her husband discovered there was no longer room for them in this city. -

A group of lawyers bought the 17-unit Victorian building in which they lived to convert into offices. Unable to find a place they could afford in San Francisco, the Brandolinos ended up in the suburb of Brisbane, where the \$500-a-month rent still is more than twice what it was in the tent-controlled North Beach apartment.

It's not that the family is poor. Mrs. Brandolino, 62, part owner of a small North Beach hamburger stand, and her husband, a printer, earn about \$30,000 a year. But the family simply could not afford apartments that in North Beach go for "\$900 or \$1,000 a month," she santification, Manhattanization.

The Brandolino's story is being repeated throughout San Francisco, where a decade-long building boom has transformed the city's skyline and its population.

neighborhood, once a thriving Italbeatniks, now home to chic restaurants, high- rent apartments and increasing numbers of offices. In short, San Francisco has become perhaps the most gentrified

large city in the nation. Districts that a decade ago were blue collar are now ghettos for young urban consumption-oriented economy in which one highly successful new chain store mass-markets croissants through a sort of Yuppie version of doughnut shops.

The city planning director, Dean Macris, calls it the "boutiquing of San Francisco." Whatever its name, its result is

spiraling housing costs, trafficclogged streets, an exodus of mid-One example is Brandolino's old dle class and poor families, and declining black and hispanic popuian district, later an enclave for lations. The trend seems certain to continue despite a new effort by the city to limit growth, restrain housing costs and preserve neighbor-

MOSCOW - The Dutch foreign ninister said Wednesday that talks here with Foreign Minister Andrei A. Gromyko did not produce any developments likely to change the Dutch position on accepting U.S. medium-range nuclear missiles.

The minister, Hans van den

Broek, said he was "disappointed" in the Soviet reaction to what he called a Dutch "signal" toward reducing nuclear arms in Europe. Mr. van den Broek arrived Tuesday in Moscow for a brief visit with Mr. Gromyko to outline the posi-

tion of the Netherlands on medi-The Soviet leader, Mikhail S. Gorbachev, announced Sunday that he had ordered deployments of medium-range missiles in Europe

to be halted until Nov. 1.

The Dutch government has said that it would decide Nov. I on how many U.S. medium-range missiles it would deploy as a member of the North Atlantic Treaty Organization. The Netherlands had been expected to deploy 48 cruise missiles. NATO decided in 1979 to deploy 464 cruise and 108 Pershing-2 missiles in Western Europe if the Soviet Union and the United States did not agree to reduce medium-range clear missiles in Europe.

The other four countries designated to receive the missiles. West Germany, Italy, Britain and Bel-gium, have started deploying them. The Dutch said the number of missiles to be deployed in the Netherlands would depend upon how many SS-20 missiles the Soviet

NATO says the Soviet Union had deployed 378 ss-20s by June A few years ago, there were no and now have 414, an increase of

Mr. van den Broek said he told Mr. Gromyko it was inevitable that the Netherlands would take the U.S. missiles unless the Soviet numbers are reduced.

Asked if Mr. Gromyko had challenged the NATO figures, or had given his own, Mr. van den Broek said the foreign minister had not.

■ French-German Position

Foreign Minister Hans-Dietrich Genscher of West Germany indiated Tuesday that the French and West German governments planned to develop a joint position on President Ronald Reagan's pro-posal for space-based missile defenses that could serve as the basis of a common European stance on the issue, the Los Angeles Times reported from Bonn.

In a written statement on European technical cooperation, Mr. Genscher noted West German efforts to for

position on the Reagan program.

"As already proposed with the French government, it involves a French-German position as the starting point of a European position to which other interested European countries are invited to help develop," he said.

Both Mr. Genscher and the French minister for external rela-tions, Roland Dumas, indicated last month in Brussels that France ponents, especially among academ- ment Tuesday was viewed as the ic cadres," and that intellectuals clearest sign yet that the two coun-should be reminded of their depen-tries would conclude such an ar-by the government. rangement.

Senior U.S. officials said Mr. Baker's opening speech to the not known.

U.S. Warns of Backlash to Trade Talks summit meeting in Bonn next previous statements, he has ruled out a tax increase. States. West Germany, Japan, France, Britain, Canada, Italy and the EC Commission.

"As the OECD secretariat suggesis, there are elements for concerted expansion of our economies, involving classical stimulation in the fiscal area for example, and moving on reducing trade barriers." a delegate to the meeting said Wednesday. "Washington might get a date on the trade round, but only if other elements of the package are in place. There are many

nknown quantities."

These are other key questions that will be posed during the meeting according to OECD and delegation sources:

 What message on reducing the U.S. budget deficit will be delivered by James A. Baker 3d, secregrowth in the OECD area, which includes North America, Europe and the Pacific.

According to the OECD secretary and leader of the U.S. delegation? European OECD members said they hoped Mr. Baker would make a "forceful," credible" commitment to reducing the U.S. deficit, which could help reduce the impact of high interest rates and the strong dollar on the world economy. "The administra-tion has started, but more convincing action is needed, perhaps a tax

riers to trade and creating jobs.

Baker's opening speech to the Japanese. The agreements in this proposal, meeting probably would "contain changes."

however, may not emerge until a no great surprises," and that, in

 What new commitments might European countries make to stimulating their economies? U.S. and OECD officials have suggested that West Germany consider accelerating tax cuts it has planned in two stages for 1986 and 1988. Britain and, to a lesser degree, France might adopt more expansionary monetary and fiscal policies, according to these officials.

U.S. officials also have urged Europeans governments to relax goverument controls over financial markets, state-owned industries 🤌 and subsidies.

West German officials have ruled out speeding up tax reduc-tions and most European officials have resisted making commitments to deregulate their economies.

 How and when will Japan carry out its market-opening and trade-liberalization package unveiled Tuesday in Tokyo? U.S., European and OECD sources said Japan's willingness to liberalize its economy was a prerequisite for similar moves in their countries.

Mr. Brock, who was nominated to the U.S. secretary of labor, said Japan's package reflected "real courage," but that the U.S. would remain "cautions" because, despite promises by Tokyo to liberalize the Japanese economy, "nothing ever

Libel Verdict **Upsets Editors** By Citing 'Muckraking'

WASHINGTON - Newspaper editors in the United States have expressed dismay that a U.S. appeals court reinstated a libel verdict against The Washington Post in an action brought by a retired president of the Mobil Oil Corp.

The decision, handed down Tuesday by the U.S. Court of Appeals for the District of Columbia, was particularly troubling to many American editors, who have gathered here for their annual convention. In recent years the editors have come to view U.S. appeals courts as bastions defending news organizations from the large libel judgments that have become almost commonplace in lower courts.

"It's become an epidemic," said Gene Roberts, executive editor of The Philadelphia Inquirer. He said that about 21 libel suits brought by public officials against news orga-nizations in Philadelphia were be-

The decision Tuesday involved a Washington Post article that said William P. Tayonlareas, the plainriff, had "set up his son," Peter, in the shipping business. It implied that he had used his position and corporate assets to benefit his son by steering Mobil business to his son's company, Atlas Maritime, based in London.

Critics of the news media applanded the ruling. "We were quite overwhelmed and pleased," said Michael P. McDonald, general counsel to the American Legal Foundation, a conservative public interest law firm that helps people bring libel suits.

The editors said they were especially troubled that a majority of the three-judge panel cited The Post's emphasis on "hard-hitting investigative stories" or "sophisticated muckraking" as a relevant factor in considering whether a newspaper's employees had acted in reckless disregard of the truth.

The term "muckrakers" was first applied to a group of American journalists, active at the turn of the century, who were committed to the exposure of industrial abuses and political corruption.

Mr. Tavoulareas said he had "felt from the beginning that The Post either knew the story was false has contracted with the company gard for whether it was true or for assembly of the F-16. And the false."

The Post's lawyers said Tuesday that they would ask the 10 full-time company \$1.15 billion in work. judges of the appeals court to rehear arguments in the case and overturn Tuesday's decision.

Tom Bradley gives the victory sign in Los Angeles.

Bradley Wins 4th Term As Mayor of Los Angeles

LOS ANGELES — Tom Bradley, who became the first black mayor of Los Angeles in 1973, has won a fourth term in

Mr. Bradley, 67, led the campaign to bring the Olympic Games to the second biggest U.S. city last summer and has been credited with rebuilding the decaying business center.

He told his cheering supporters: "Los Angeles has made history. This city elects its leader-ship based not on color or sex. Los Angeles is the city of hope and opportunity, and I am the living example of this princi-

With votes from Tuesday's election still being counted Wednesday, Mr. Bradley was ahead of his chief opponent, John Ferraro, by a 67-percent to 31-percent margin. There was a low election turnout among the city's 1,370,000 vot-

Many political experts think that Mr. Bradley, a liberal Democrat, will seek the governorship of California again next year. He was defeated in 1982 by 52,195 votes out of 7.5 mil-lion cast.

Taipei Trial: The Who, But Not Why

Key Untouched Issue Was Government's Role in Murder

By Steve Lohr

New York Times Service TAIPEI — Although two gang members have been convicted of plotting and carrying out the mur-der last year of a Chinese-American writer in California, key aspects of the internationally watched case remain unresolved. "The central issue that hasn't been explained is the motivation."

NEWS ANALYSIS

noted one Westerner who has followed the case closely. Two members of the Bamboo Union, Taiwan's biggest gang, were found guilty of killing Henry Liu, who had written a critical biogra-phy of Taiwan's president, Chiang Ching-kuo. Mr. Liu was shot to death in the garage of his Daly City, California, home on Oct. 15, 1984.

The three-judge panel of the Tai-pei District Court handed down life sentences to Chen Chi-li, the leader of the Bamboo Union, and Wu Tun, who had confessed to being one of the gunmen. They will be eligible for parole after serving

10 years.

A third gang member, Tung believed to have fled the country. Those who watched the case said that in its verdict the court seemed to acknowledge, by not giving the two men the maximum penalty of

death, that they did not bear sole responsibility for the killing.

The court said Mr. Wu had no reason to kill Mr. Liu and that he was merely following the orders of his boss, Mr. Chen, And Mr. Chen, the judges said, had cooperated with the court and confessed.

What Mr. Chen confessed was that he had followed the orders of the former chief of Taiwan's military intelligence bureau to have Mr. Liu killed, That far more sensitive issue, with the culpability in the Liu murder possibly extending to the upper levels of a government agency, is being handled in a sec-ond court case.

Chen Chi-li

Wu Tun

Three former intelligence officers, Vice Admiral Wang Hsi-ling, the former head of the intelligence bureau, and two aides, are being tried before a military tribunal on charges that they participated in the murder plot. The three were dismissed from the government in January, when the charges became public, and are in military custody. Admiral Wang has denied order-ing Mr. Liu killed, although he did

agree with Mr. Chen's testimony that he had said the dissident writer should be "taught a lesson." The admiral also admitted that he gave Mr. Chen a photograph of Mr. Liu and his address. Mr. Chen. a known gangster, then was given training by the intelligence bureau. Still, Admiral Wang insisted in

testimony to the military court last week that the killing itself was sole-ly Mr. Chen's idea. "I shouldn't have to take responsibility," the admiral said.

The possibility that the former intelligence chief will escape any punishment seems increasingly unlikely, officials here suggest. Recent comments by senior government officials portray the admiral and his colleagues as a handful of misfits. The comments also stress that associating with gangsters and kill-ing political dissidents are not government policy.

in response to questions from legislators, Premier Yu Kuo-hua said: "There are intelligence and security units in every country. And in every agency or organiza-tion it's unavoidable that there will be a few misguided elements."

But all the official distancing from the intelligence bureau's activities does not explain what the motive, however misguided, may have been for the actions by Admiral Wang, who was a military secretary to Chiang Kai-shek, the Na tionalist leader who died in 1975.

Government critics and West erners who watched the case closely are skeptical that there will be a full airing of the issues in Taiwan's courts, especially with the potential of further embarrassment to the

government. These are show trials to give the world the impression that justice has been done," said Antonio Chiang, the editor of an opposition magazine. But the government will try to close the case down fairly quickly, and it looks like Vice Admiral Wang will be sacrificed."

By Taiwan standards, the openness of the trials have been extraordinary. And much of the testimony has been an embarrassment to the government. The local newspapers, which are government controlled, have carried thorough accounts of

the proceedings.
International and domestic pressures apparently have ensured that the court sessions would be more freewheeling than usual. The U.S. government has demanded that the persons responsible for Mr. Liu's death be punished and that the

facts in the case come out. In addition, the Daly City Police and the Federal Bureau of Investigation are conducting their investigations of the murder. So any obvious cover-up in Taipei might be

Gorbachev's Real Agenda

One month into what he must hope will be a 20-year reign as Soviet leader, Mikhail Gorba-chev calls Pravda to give it the answers, and questions, of his first "interview" on foreign affairs. He is respectful, even hopeful, about the United States. Better relations are not only necessary but possible. There is nothing "inborn" about superpower confrontations. He looks forward to meeting President Reagan to give their relationship a "serious impulse" on arms control and a range of other issues.

He is also shrewdly seductive to Western Europe. Other countries also count, he insists. America's allies should not take the economic bait of becoming "accomplices" in the danger-ous Strategic Defense Initiative. They should help terminate - note: no longer undo - the deployment of U.S.-built Euromissiles. Toward that end, the Soviet Union will freeze its deployments against Europe for six months.

What a vigorous new performer, say the Kremlinologists. Nothing new, cries the White House. A crafty ploy to split the alliance, says the Pentagon. Meaningful offers should be made confidentially at Geneva, says the State Department. These American responses are all true — and overwrought. They neglect the context in which Mr. Gorbachev must operate. They confuse an American election, which concludes a contest for power, with a Soviet accession, which may mark the beginning.

The expectation of a swift revival of Soviet leadership is understandable. Mr. Gorbachev is only 54 and the successor to three ailing septuagenarians. But he has been warily elevated by an aged Politburo. He leads a party and government that Pravda now denounces daily as unimaginative, inefficient, corrupt. He presides over an economy that has stopped growing. He confronts a formidable but hungry military machine, bogged down in Afghanistan and challenged by a U.S. buildup.

Mr. Gorbachev's real agenda is not yet Geneva, or Washington, or even that most invit-ing tourist lure, Beijing. He is maneuvering to get his close associates onto the Politburo and to build his own power base. Throughout the Soviet Union, party meetings report discussing "personnel policy in the light of the March plenum," the secret gathering that elected Mr. Gorbachev leader. He is building toward a new party congress and a new five-year plan by the end of the year. And until then, he is surely scratching for consensus among the party bosses, the KGB, the military commanders and the budget makers.

Small wonder that in this first pitch to the West he sounded like his predecessors - and their common foreign minister, Andrei Gromyko. Of course Mr. Gorbachev has no new arms control plan or quick path out of Afghan-istan. Of course he balances cordiality to President Reagan with a protective wink to Prime Minister Thatcher and Chancellor Kohl.

Is he then saying nothing of interest at all? Not quite. To sharply tuned Soviet ears, he said on his way to the top that the ultimate guarantor of national security was not the military but the Soviet economy. In his first weeks in office he said he wanted a new productivity based on tough discipline in all economic sectors. And now he balances the promise of austerity with a hope for better ties (and trade?) with America. It forms a pattern.

Americans cannot yet judge Mr. Gorba-chev's strength or policy. But as we are mature, we will reciprocate the cordiality, stop fretting about the fragility of the North Atlantic Treaty Organization and prepare a list of mutual accommodations. By the time he is ready to visit the White House, the Soviet leader should know what policy gifts are most desired and which he might expect in return.

- THE NEW YORK TIMES.

Insecurity in Securities

Another dealer in U.S. government securities has filed for bankruptcy, sharpening the demands in Congress that these operations be regulated. The most recent firm to fail, Bevill, Bresler and Schulman Asset Management Corp. of Livingston, New Jersey, is smaller than ESM Government Securities, the Florida dealer that folded last month. But both failures will bring substantial losses to financial institutions that were their customers. The government has charged both firms with fraud.

Regulation cannot prevent fraud. Regulation ought not guarantee complete safety to the dealers' customers, for those customers are professional money managers and the government has no obligation to relieve them of the need to be careful about the credit and reliability of the people with whom they deal. For the government to guarantee these dealers would come close to insuring financial speculation. But a modest amount of regulation, beginning with registration of dealers, would be useful in a market that has grown with astounding

speed over the past decade. The government securities dealers used to be a tight little circle of experienced competitors who knew each other well. But the circle has expanded with the rise in the U.S. federal trade. The growth of this market is one consequence of President Reagan's budget deficits. E. Gerald Corrigan, the president of the New York Federal Reserve Bank, recently told a congressional committee that it is not uncommon for more than \$200 billion in government securities to change hands in one day of trading. In comparison, the federal budget is \$2.6 billion a day and the gross national product, the total output of goods and services, is \$10.5 billion a day. As one would expect in a boisterous and rapidly growing market, some

securities firms are less sound than others. The victims of fraud and failure are usually incautious money managers simply looking for the highest possible returns. They know that Treasury securities are risk-free, and they often assume — incorrectly — that the dealers therefore must be risk-free as well.

As Mr. Corrigan told Congress, it is the professional money managers' job to know a lot about the firms with which they do business. Much of these dealers' business is borrowing and lending with government securities as collateral. While a high rate offered may be the sign of a successful competitor, it may also be the sign of a desperate dealer sliding into serious trouble. It is up to investors to distinguish between the two. The government is to have to set some ru Treasury securities — is the dealers' stock in But it has no duty to protect careless players. - THE WASHINGTON POST.

Other Opinion

Balancing the Budget Cuts

President Reagan and Senate Republican leaders have reached significant compromises on the federal budget, but much more give and take will be necessary. No one can quarrel with the intent of the spending reductions - to reduce the federal budget deficit. Legitimate questions can be raised, however, as to whether the elderly, those near the poverty level, and local governments should bear the brunt of increased military spending.

- The Seattle Post-Intelligencer.

Japan's Promise on Trade

Doubts remain whether the immediate market-opening measures announced Tuesday can really reduce Japan's trade surpluses. Prime Minister Yasuhiro Nakasone stated that "Japan will carry out its responsibilities and roles commensurate to its economic power." But if he does not pin down the outline of his "action program" and put a certain amount of meat on separate measures by the time of the May summit of industrialized nations, he may be strongly criticized by other countries for 'violating a public promise."

- The Yomiuri Shimbun (Tokyo). The latest Japanese package is barely enough to rein in the American Congress,

which is threatening surcharges on imports from Japan. Even if the Japanese government were totally committed to trade disarmament — and what government is? — the Japanese economic system would not open up to imports in a way that could be expected to eradicate its \$37 billion surplus on trade with America. But Japan is not the only trade offender, even in American eyes: they can see

protectionism rising in Europe too. The worst resolution of the dispute between America and Japan would be the construction of new tariff walls in the United States. The second worst would be the opening of private two-way trade channels between the free world's two most powerful economies. - The Times (London).

The United States has a tendency to define everything according to its own methods and frameworks and label as unfair anything that is different. It is important for Japan to clearly separate what should be emphasized as its own unique systems and customs and what should be reformed so that it is more acceptable internationally. Even if Japan opens its doors with the intention of taking the lead in defending free trade, imports probably will not increase if foreign manufactured goods lack attractive price and quality. It is necessary for Japan to repeat this obvious idea.

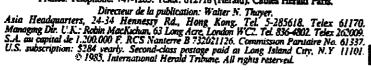

-- The Asahi Shimbsm (Tokyo).

FROM OUR APRIL 11 PAGES, 75 AND 50 YEARS AGO

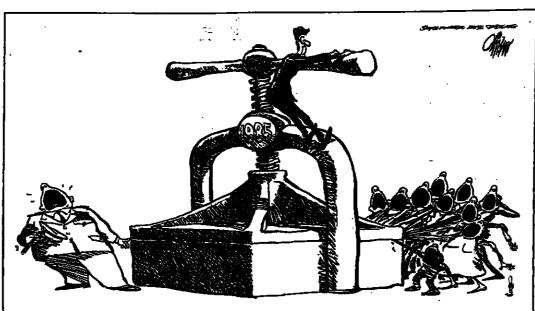

1910: Envoy Is Booted for Portugal LOS ANGELÉS — Governor Henry T. Gage began his diplomatic career when he took the oath as Minister to Portugal, gathered his 18 new pair of boots and started for Lisbon. When his appointment was announced, a London tailor who makes a specialty of togging out diplomats sent a circular telling Mr. Gage he must get a diplomatic dress, consisting of a pair of knickerbockers and silk stockings and a neat pair of ladylike slippers. He threw the diagrams of the Lord Fauntleroy attire in the wastebasket. Then he sent out to his bootmaker and had 18 pairs of new boots made. His friends had been wondering if diplomatic life would at last induce him to abandon his life-long habit of wearing high-topped boots.

1935: Goering Marries Stage Actress BERLIN - While 200 airplanes roared over the capital, bands played, crowds cheered and guards of honor presented arms, General Her-mann Goering, Minister of Air and Prussian Prime Minister, was married [on April 10] to Fräulein Emmy Sonnemann, blonde star of the Prussian State Theater. Reichsführer Hitler was one of the two best men. General Goering, resplendent in the uniform of the Air Force, drove to his bride's home at noon. The couple then went to the Town Hall in a flowerdecorated automobile following a detachment of General Goering's special police on motor-cycles. Herr Hitler and Herr Kerrl, Speaker of the Prussian Diet, were in the first car, which was followed by the Führer's bodyguard.

Squeezing the Budget's Wrong End

N EW YORK — In dealing with Congress, Ronald Reagan is as effective as any president since Franklin Roosevelt — and FDR always had Democratic majorities. Mr. Reagan's "budget compro-mise" with Senate Republican lead-ers looks like another nice piece of legislative footwork - although it is medicine for the wrong disease, and its political consequences re-

main to be seen. The new Reagan-Republican budget package, which the White House says Mr. Reagan is prepared to fight for, would cut projected spending in fiscal 1986 by \$52 billion; over the next three years, spending would go down by nearly \$300 billion. If all projections hold up, that would reduce the federal deficit to "only" \$99.7 billion in fiscal year 1988.

In that three-year period, howev-er, the Reagan-Republican package would mount a direct assault on middle-class benefit programs. It would restrict cost-of-living benefits for Social Security recipients, violating one of Mr. Reagan's strongest campaign promises; raise the cost of Medicare benefits to the recipients; and cut or eliminate farm price supports, student loans. crop and flood insurance, soil and water conservation programs, Na-tional Institute of Health grants, the Export-Import Bank and the Small Business Administration.

The package would attack post-New Deal government across the board. Mass-transit aid, urban development grants and other programs of importance to the cities By Tom Wicker

would be reduced or canceled; Amtrak, rural electrification, the Job Corps, general revenue sharing and economic development programs would be killed.

But these deep spending cuts only partly attack the fundamental causes of the deficit. The chief culprit is Mr. Reagan's 1981 tax reduc-tion; Donald Regan, the former Treasury secretary who is now White House chief of staff, has estimated that the tax cut causes \$135 billion of the prospective \$213-billion deficit this year. Yet no increase in revenues is proposed in the Reagan-Republican package.

A second major cause of the deficit is increased military spending, which has risen by 60 percent in the Reagan years, against only a 28percent increase in nonmilitary spending. But the compromise package is aimed primarily at rela-tively innocent — and in many cases effective - social programs. It would cut Mr. Reagan's requested 6-percent annual increase for the Pentagon to 3 percent (after infla-tion) in each of the next three years, saving \$70 billion; but it would cut nonmilitary programs more than twice as much, by \$152 billion.

A third big factor in the deficit is rising entitlements spending. Mr. Reagan and the Republican senators deserve credit for recognizing this difficult fact, even in violation of the president's campaign promises not to cut Social Security. Nevertheless, cost-of-living reductions

for the elderly over a three-year period, coupled with rising charges for Medicare benefits, will be so hard to achieve that they cast doubt on even the president's ability to push through this deficit-reduc-

tion package.
It is not just the elderly recipients who will resist; their children fear they may have to make up the difference from their own pockets.
Only at a time of \$200 billion

deficits — which, ironically, he did more than anyone to create -would the kind of broad assault on government that Mr. Reagan now projects be remotely possible; and he has shrewdly taken advantage of the opening. Even the budget "compromise" appears to have been calculated; not until enough senators had sworn to cut domestic programs if only Mr. Reagan would agree to cut military spending did he "cave in" — accepting, at that, substantially smaller reductions than the senators wanted.

Clearly, this determined president is gambling that his conservative vision of a government largely removed from a major social role is now more acceptable to the public than the liberal Democratic approach that has dominated the last half-century.

That is a riverboat gamble indeed, since there is little evidence that Americans want to reduce the deficit by cutting programs of benefit to themselves, and since Mr. Reagan must know by now that to tinker with Social Security benefits is to play with political fire.

The New York Times.

Walls Against Japan': Belatedly, a Warning By Joseph Kraft VASHINGTON - Inscrutable Many Instruction

WASHINGTON — Inscrutable Oriental mysteries such as the Tea Ceremony and the No Drama come to mind when people speak of cultural obstacles" to economic cooperation with Japan. But such mundane things as patterns of spending and savings are chiefly involved.

Japanese habits are such that in

order to retaliate for Japanese trade restrictions the United States first has to shoot itself in the foot - which explains why the Reagan administra-tion has suddenly rallied against the anti-Japanese mood in Congress.

Consider, first, savings. Japan is not a consumer society in the American fashion. There are practically no credit cards. Nor are there consumer loans, with tax breaks, to ease the buying of homes or cars or gadgets.
On the contrary, ordinary Japanese
make purchases the old-fashioned
way. They save the money.
Major banks, with their huge de-

posits, are closely regulated by government, as a means of guiding the development of industry. Low-interest loans are available to businesses favored by the bureaucrats in the Finance Ministry or the Ministry of International Trade and Industry. Since Japan is a country almost

naked of natural resources, the bureaucrats inevitably favor industries that can export, thus earning the foreign currency the country needs to buy vital raw materials. The bureaucrats also tend to defend against outside competition for the clients of the ruling Liberal Democratic Party notably farmers and businessmen.

One consequence of this is the labled efficiency of Japanese manufacexport of Japanese savings to countries that offer higher interest rates

and better returns on investment.

During the past few years the United States has been the chief beneficiary. Japanese investments, mainly in straight down into chaos." U.S. government securities, amounted to about \$40 billion in 1984. The "crowding in" of Japanese money has made it easier for the United States to finance its \$200-billion deficits without "crowding out" credit for American consumers and business.

At the same time, the surge Japanese investment in the United States has contributed enormously to against other currencies. And the super-dollar, of course, makes many foreign exports more attractive.

Many Japanese acknowledge that the dollar should trade at a little less than 200 yen. Instead, it has been buying upward of 250 yen.

American victims of the overpriced dollar naturally complain; they are, after all, losing business, jobs and farms. They say that, unless Japan opens its markets, the United States must retaliate by closing its markets to Japanese goods.

A fortnight ago the Senate voted 92-0 for a resolution embodying such action. Before Easter, the Senate Finance Committee had voted out a bill translating the resolution into legislation. The administration, at first, tried to play it cute. The 92-0 vote meant the White House was not fighting the resolution. The strategy was to use the resolution as a stick to beat concessions out of the Japanese. But the indulgence of Japan-bashing

produced a negative outcome.

Tuesday, in Tokyo, the Japanese concluded a review of openings for American trade. The review offered little except promises. But it was accompanied by an impassioned, na-tionally televised statement from Prime Minister Yasuhiro Nakasone. Mr. Nakasone appealed "to you the people" and to the "industrial cir-cles" to "accept foreign-manufactured products in order to make your &

own life richer and more affluent." That did nothing to assuage U.S. congressional critics of Japan. But it conveyed Mr. Nakasone's sense of impotence in a desperate situation. The Reagan administration, once so passive in opposing shots at Japan, rallied to the alarm bell.

White House officials and the turers. Another consequence is the State Department praised the Japanese statement as "commendable." Vice President George Bush said those who wanted to build "walls against Japan . . . would end up with a cliff, and we'd find ourselves falling

For once the vice president did not exaggerate. American efforts to punish Japan inevitably boomerang. Such efforts not only raise the cost of goods, they also work to increase in-terest rates in the United States. Higher rates slow U.S. economic growth and raise the danger of a default on the billions owed to U.S. banks by Latin American countries. the strengthening of the dollar. So in fighting the Japan-bashers, the administration has come to its senses and not a moment too soon.

Questions on Past Accords Hang Over Geneva Talks

By John C. Ausland

many years, President Reagan has allayed U.S. concern." adopted a more positive tone. At the same time he publicly accuses the Russians of cheating. It is not easy to see how these approaches can be reconciled. In fact, the question of Soviet compliance with past arms control agreements has become a roadblock in the way of progress in Geneva.

Paul Nitze, who is experienced in negotiating with the Russians, stated the Reagan administration's arms control goals in a speech Feb. 20 in Philadelphia. He said the objective during the next 10 years is "a radical reduction of the power of existing and planned offensive nuclear arms" after that would come a transition to

The most serious U.S. charge deals with a gigantic Soviet radar being built in Siberia.

a greater reliance on nonnuclear defenses against nuclear arms.

Before the Nitze speech, the White
House made public on Feb. I an

indictment of alleged Soviet noncompliance with arms control agreements. Critics say this report to Congress was engineered by opponents of arms control. In any case, the Reagan report is now a hurdle that must be cleared before any arms control reement can be concluded.

Up to now, the United States has monitored Soviet compliance with arms accords by using "national tech-nical means of verification." This meant employing satellites and electronic installations outside, or over, the Soviet Union in order not to arouse the anxiety of Soviet leaders about the fragility of their regime.

These sources produce a flood of information. But while it is one thing for American leaders to be convinced that the Russians are cheating, it is another to persuade Kremlin leaders to do something about it. The groundwork for this task has in the past been left mostly to the Soviet-American Standing Consultative Commission, which will be meeting his month and next in Geneva.

The commission was set up at the time of the signature of the SALT-1 agreements in 1972. It usually meets every spring and fall for about two months. Although some information about the group has been published, its proceedings have been kept secret. What little the commission has accomplished in recent years is largely due to the fact that it has remained out of the spotlight.

There are sharp differences within the Reagan administration on the extent of the commission's accomplishments. The 1982 edition of "Arms Control and Disarmament," published by the U.S. Arms Control and Disarmament Agency, says: "Both the United States and the Soviet Union have raised a number of questions in the Commission relating to each side's compliance with the SALT-1 agreements. In each case raised by the United States, the Sovi-

OSLO — After taking a negative et activity in question has either ceased or additional information has

But critics of the SALT accords consider such statements whitewashes. Richard Perle, assistant defense secretary for international security policy, told a Senate committee last year that "serious compliance problems have generally not been resolved by the SCC or in any other manner." Those who support this view managed years ago to get Congress to require regular reports from the president about Soviet compliance with arms control pacts. Although President Reagan's Feb.

l report contains considerable evi-dence of questionable Soviet behavior, the significance of the various allegations has to be weighed. The most serious is unquestionably a gi-gantic radar installation being built at Krasnoyarsk in Siberia. Mr. Rea-gan's report flatly maintains that this radar "constitutés a violation of legal obligations under the Anti-Ballistic Missile Treaty."

The Krasnoyarsk radar is only the most advertised of the developments that have convinced the Reagan administration that the Russians may be preparing to renounce the ABM treaty and deploy a nationwide ABM system. It should be no surprise that the Russians accuse the Reagan administration of the same thing - in fact, of seeking to develop a firststrike nuclear capability in the 1980s. Even critics of the Reagan admin-

istration's arms control policy con-cede that doubts about the Krasnoyarsk radar must be resolved before progress can be made on new agreements. But they say the president is wrong in making public his charge of Soviet cheating.

There can be little doubt that the

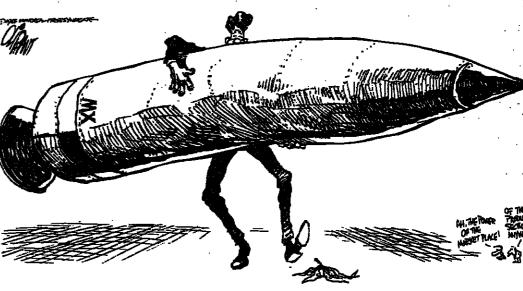

ministration fully intends to do something about what it calls "the erosion in the Anti-Ballistic Missile Treaty regime." Secretary of State George Shultz took the matter up with Foreign Minister Andrei Gro-myko in Geneva in January. Mr. Gromyko seems to have just listened.

American officials say they have not given up on getting the Russians to "improve their behavior" and thus make progress on new agreements possible. Yet if the Russians are unable to persuade the Americans that the Krasnoyarsk radar is intended for tracking space vehicles - and not incoming missiles — it is hard to imagine them dismantling it.

If compliance issues are not resolved before too long, the stage will be set for a showdown within the Reagan administration regarding arms control. Meanwhile, a large chunk of the money devoted to the president's Strategic Defense Initiative goes to the development of an American land-based system. A test conducted last year demonstrated that a nonnuclear missile could inter-

cept an incoming warhead. While the space aspects of the SDI are dramatic and important, the key decisions on these will not be made until the 1990s. The way things are going, the question of going ahead with an American land-based ABM is likely to arise sconer.

of Sudan. But clearly the root of his problem was financial.

Sudan is hardly alone among African countries caught in protracted debt crises, unable to escape bankruptcy without incurring new loans, often at higher interest rates. Very often at higher interest rates. Very few of these cash-starved states are solvent enough to follow Nigeria in its hard-line refusal to comply with IMF conditions for new credits.

servicing alone gobbles up a third to a 🗀 half of annual export earnings. In 1981, African countries constituted 20 of the 32 developing countries reported in arrears on external pay-ments; in 1984, they accounted for 10 of the 14 countries whose accounts were submitted to the so-called Paris Club, the international group that renegotiates national public debts.

Unlike many Latin American debtor nations, the Africans owe mainly official debt — to other governments or international financial institutions. But this hardly alleviates their calamity, for governments, like private banks, expect to be repaid. The bulk of Africa's total foreign debt, estimated at \$150 billion in 1983, is owed to Western Europe, which remains the Africans' main urading partner. The United States is.

however, also deeply implicated. This is true not only because of U.S. strategic and political interests in Alrica — America needs an Alrican transit point for its Rapid De-ployment Force and depends on im-ports of African minerals — but also because default by Africa's big debiors would severely endanger the glob-

nomic breakdown from provoking political upheaval across the contischeduling, a debt moratorium and new credit. The United States should. however, focus on encouraging Africans to become economically selftheir debt crisis or secure the future of the estimated 150 million Africans who are threatened by starvation.

Varning Show of Hands Show of Hands Fights Racism Among French Reuters million French teen-age million French teen-age million French teen-age

sporting a new symbol to fight racial discrimination, a badge that reads "Ne touche pas à mon pote"

— "Hands off my buddy."

When Harlem Desir, 25, and a group of friends designed the hand-shaped badge last October, they had no idea the symbol would become so popular. But racism and France's four million foreigners have become a focus of national debate, particularly among young people. Throughout France they are pinning the bright badges to their clothes and plastering walls with anti-racism posters supplied

by Mr. Desir's Paris-based group, "SOS Racism." "SOS is the biggest youth movement since the student uprising of May 1968," said Mr. Desir, who is the son of a French woman from Alsace and a French man from the Caribbean territory of

"We set it up after a friend was threatened by commuters who claimed he'd stolen a wallet, just because he was black," he said.

At SOS headquarters in one of Paris's dingiest immigrant districts, the telephone hardly stops ringing. Teen-agers call from across the country to report cases of discrimination.

Skin color was no problem at school or on the street," said Jean-Pierre Chaumont, 22, an SOS organizer. "But the old people now are brainwashing us with their racist hatred."

As in the 1930s, he said, people facing tough times and unemployment are turning on foreign workers as scapegoaus. In recent months there has been a wave of race-

related killings in France. A young Algerian tourist was beaten and thrown from a moving train by four French soldiers. A Moroccan was shot to death for talking to a white woman, and an 11-year-old was paralyzed after being struck by a man irritated by noise made by

loreign youngsters. The last few weeks have seen three attacks -- the killing of two North African workers and a bomb attack at a Jewish film festival in Paris that injured 26 persons.

The cinema attack strengthened the efforts of some members of the Jewish and Moslem communities to fight discrimination together. "They know as well as we do that if blacks and

Arabs are in the front line, the Jews are in the second," Mr. Désir said.

Church and community leaders also express indignation over the growing violence and harassment faced by immigrants.

"I fear I am beginning to feel ashamed of my country, where respect for the dignity of others is beginning to ebb," said Archbishop Jean-Marie Lustiger, the Roman Catholic primate of Paris.

Political leaders, confronted with the re-emergence of the extreme right in France, have welcomed SOS. They see it as a means to combat the rising fortunes of Jean-Marie Le Pen, whose National Front captured nearly 9 percent of the national vote in local elections last month.

Opening the spring session of the National As-sembly last week, Prime Minister Laurent Fabius called on the French people to join the "pacifist struggle" against discrimination. Mr. Le Pen has joined the battle of the badges.

His badge, designed to promote his campaign to "Keep France for the French," reads "Hands Off

customers abroad. The official said that none of the goods being exported would be of much use to those in the camps famished people need enriched grains, not meat and hides - and that Ethiopia had to earn foreign

currency to pay for vital imports. Then, his temper rising, he made a point seldom mentioned in discussions of the country's plight: "Listen, we've got nine million people or so who are starving or close to it. That still leaves more than 30 million Ethiopians who are not starving. Their lives can't just come to a full stop." There are many people in Ethio-

pia who not only remain largely unaffected by the famine but also do not even know much about it. Travel is difficult in this mountainous country, and the shocking pictures and descriptions on television and in newspapers in the West do not appear in Marxist-ruled Ethiopia's tightly controlled press. "Until all the journalists and aid

people started coming here, we didn't know what was going on in the north," an Addis Ababa University student said. "I mean, we heard stories, rumors, but we really had no idea it was so bad."

Addis Ababa often seems particularly distant from the famine. There are frequent shortages of bread, salt and other commodities, but that does not make the capital city different from many others across Africa.

fronically, Addis Ababa has be- were driving through Addis Ababa come more cosmopolitan, more and passed one of the ubiquitous lively, and more prosperous since posters of Marx, Lenin and Engels.

Starving 'Other Half' Is Invisible in Addis Ababa

For months, the city has been overflowing with aid workers from several dozen organizations, photographers, writers, and filmmakers from lowa to Asia, diplomats and politicians from a score of countries. The grander hotels have stock and other food products to long been booked solid. Houses are almost impossible to rent, although

new construction is proceeding swiftly. Restaurants tend to be packed. Tennis courts are reserved days in advance. A fleet of cream-colored government taxis takes the visiting lumi-

naries to meetings, briefings, and ample luncheons and dinners. The cabs tend to avoid the many neighborhoods of concrete shacks with metal roofs rusted to various shades of other. They seldom venture down the packed dirt streets heavily traveled by small donkeys and ancient, gnarled women, all bearing oversize burdens.

Instead, the taxis tend to keep to the wide boulevards, extravagantly decorated with heroic, revolutionary monuments, hammer-and-sickemblems, giant portraits of Marx, Lenin, Engels and Mengistu Haile Mariam, Ethiopia's leader, as well as with banners and billboards inscribed with such slogans as: "Long live proletarian internation-

A peculiarly Ethiopian profes-sion is that of the "minder," who accompanies foreigners who want to travel outside the capital. Some of these government employees work hard to be helpful guides and translators. Others see their role as being basically baby-sitter and watchdog. However described, they are now more or less accepted as a fact of life here.

Recently, two British airmen

Observers of Famine Bringing Prosperity and Progress to Ethiopia's Capital Ethiopia's agony came to the "Who are those blokes?" one Brit- that can sometimes seem far reon asked the other. "Marx and Lenin," his compan-

America.

President Belisario Betancur of Colombia praised Mr. Reagan's Nicaragua, and that Nicaragua initiative last week as "construc- hold internationally supervised tive" and sent his foreign minister to Cuba and Nicaragua to urge them to take advantage of the U.S.

Mexican communique made it \$14 million would be used to buy clear that Mexico was withholding guns, ammunition or other armaits support from the U.S. plan on ments. If the rebels decided after 60 the ground that it did not want to days of talks that they needed more intervene in Nicaragua's internal weapons, however, the money

"It was a diplomatic way of say-ing no," a Mexican official said. Mr. Reagan proposed a ceasefire between Nicaragua's Sandinist government and anti-government rebels who were financed by the U.S. Central Intelligence Agency

the Contadora group seeking a ne-gotiated settlement in Central America. until last summer. Mr. Reagan also proposed that the two sides hold negotiations to be mediated by Roman Catholic Church officials in

elections.

Mr. Reagan made the proposal in large part to win U.S. congressional support for \$14 million that But after a telephone call Mon-day from Mr. Reagan to President Miguel de la Madrid of Mexico, a Miguel de la Madrid of Mexico, a weapons, however, the money would become available for those

purposes. Nicaragua has rejected the pro-

posal.

The deputy foreign minister of Panama, another member of the Contadora group seeking a peace settlement, signaled that his country was lining up with the Mexi-

cans.

The fourth Contadora member,
Venezuela, said officially that the Reagan proposal should be "carefully studied and analyzed" and called for the Contadora group to take "a united position" on it.

A Venezuelan source in New York, where President Jaime Lusinchi has been meeting with bankers, said that Mr. Lusinchi had canceled all of his "media events" Tuesday because Venezuela's posi-tion on the Reagan proposal had not been determined. The source said Mr. Reagan called Mr. Lusin-chi on Monday to request his sup-

"Venezuela is going to see how we can help Mr. Reagan, but we don't want to do it alone," the source said, adding that he could see the truth in the remark of the Reverend Miguel d'Escoto Brock-man, Nicaragua's foreign minister, that the Reagan proposal means "Drop dead, or we'll kill you."

The Contadora group, which has been trying to negotiate a Central American settlement for more than two years, has run afoul of U.S. policy in the past. Last autumn Washington pressured its Central American allies to reject a proposed regional treaty drawn up by the four-nation group because the United States felt the pact favored Nicaragua.

The rewriting of that treaty has barely begun, although the Conta-dora group and the five Central American countries plan to meet Thursday and Friday in Panama to

continue the effort.

Robert C. McFarlane, who is Mr. Reagan's national security adviser, said Friday that Mr. Reagan's proposal had the backing of Colombia. Venezuela and Panama but not of Mexico.

The Mexican communiqué, issued by Mr. de la Madrid's office, broadly supported the goal of a

was performed to remove an infec-

The Associated Press machine-gunned and his family insanction — Guerrillas draced as as civil defense in the town and he said the rebels had passed the word earlier that they were going to kill him and his family.

While bodies still lay on the smoldering rubble, the survivors recounted how 300 to 500 leftist re-bels approached the village Mon-day evening and left in the dawn

light on Tuesday.
They arrived on foot and we saw them and shot first," said Mr. Jillia Dealles. "They shouted up not to shoot, that they were on con-They did it to confuse us and we stopped shooting. We thought they were part of an anti-insurgency unit. When they got closer we saw they were not soldiers.

By then it was too late to stop

On Tuesday afternoon a truck loaded with some of the bodies rumbled down the dusty road, stopping to pick up more bodies along the roadside.

In the nearby town of Santiago
Nonualco, relatives identified the
bodies, a judge recorded their
names and workers slipped them
into plain coffins lined with sacks used to hold the sugar harvest.

Curious children lined the rack of the old truck as the adults went about their grim business. When the coffins ran out, they sent word to another town to send more.

"I gave my blessing to all of them, that was all I could do," said a priest who would only give his name only as Father Octavio. He said he had served the village for 35 IUIIC

"I know of at least 20 dead and there is talk of more." the priest said, "but I don't know any more

about them." An army communique later said that 25 were killed: 15 members of the civil defense force, three other men, three women and four chil-

Some residents complained bitterly that no army troops were sent

It was not immediately clear why the guerrillas attacked the village, which residents said had previously been spared from rebel raids.

The guerrillas have been battling Salvadoran troops for more than five years.

sensitivity to electric current can be exploited to enhance their growth. "Until recently, only a limited amount of attention has been paid to the proposed "star wars" defense very tiny but steady currents which most if not all organisms pump through themselves and which appear to play a vital part in controlling the United States's weapons labtheir growth and differentiation," two scientists of the Imperial College, London, reported in the monthly journal Bio-Technology.

The researchers, K. S. Rathore and A. Goldsworthy of the college's department of pure and applied biology, applied direct current of about a millionth of an ampere to cells of tobacco plants growing in laboratory flasks. They reported that the growth rate was stimulated by about 70 percent when the culture was made negative, but that current in the reverse direction slightly inhibited growth.

Neanderthal Bones Found in Siberia

they arrived on log a withern and shot first allies. "They shouted up toot, that they were on the did it to confuse uponed shouting We log ere part of an animal and we were not soldiers." By their it was look MOSCOW (UPI) - Soviet scientists have reported the discovery of the bones of Neanderthal man in southern Siberia, sharply expanding the area believed to have been inhabited by the predecessor of modern man. "The notion that Siberia was populated by men of a modern physiological type who came from other regions of the world has been convincingly refuted," A. Derevyanko, director of the Institute of History. Philology and Philosophy of the Siberian branch of the U.S.S.R. Academy of Sciences, told Tass. "It can now be affirmed that thinking man evolved in Siberia as well.'

The report, calling the discovery a "world-class find," said the bones of Neanderthal man and animals that he was probably hunting were found in a small cave in the Gorny Altai region, more than 2,000 miles (3,200 kilometers) east of Moscow. Neanderthal man, named for the site in West Germany of the original discovery more than a century ago, is best known from the caves of Europe.

U. S. Submarine Dives to 20,000 Feet

WASHINGTON (UPI) - The Sea Cliff, a deep submergence research vehicle, recently completed a successful dive of 20,000 feet (6,100 meters) off the Pacific coast of Central America, the U.S. Navy has announced. The 25-foot submersible is believed to be the only underwater boat of its class that can now operate independently at 20,000 feet "or more," the navy said. The dive into the Middle America Trench off the Pacific coast of Central America was the last in a series of depth tests after a redesign incorporating a titanium hull and silver zinc battery. The navy said the vehicle's new operating level provides access to more than 98 percent of the world's ocean floor.

Astronomer Uses New Mirror Method

TUCSON, Arizona (NYT) - An astronomer at the University of Arizona has developed a technique of casting glass mirrors that could revolutionize optical telescopes and reduce their cost, according to the National Science Foundation.

The technique calls for mounting a furnace on a turntable. The furnace spins as it melts its charge of solid glass, and the centrifugal force forms a steeply curved face to the mirror, which eliminates much of the time and expense of grinding the glass into shape.

Dr. Roger Angel has just used the new technique to produce an experimental mirror 6 feet (1.8 meters) in diameter. When the mirror was examined after it cooled, he said, it was found to be flawless. The casting of the mirror is one step in a series of trials that Dr. Angel hopes will result in lightweight, inexpensive mirrors of about 26 feet in diameter, 9 feet wider than the mirror in the telescope at Mount Palomar in California, the largest optical telescope in the world.

Panel Reports on Brain Disorders

WASHINGTON (AP) - Many cases of babies born with brain disorders cannot be blamed on negligence or any other avoidable cause, a National Institutes of Health panel has reported.

The panel, in releasing a report on brain disorders in the newborn, said doctors rarely can pinpoint a specific event in the development of a baby that bears sole responsibility for a brain disorder. While a number of events can be factors, such as trauma or decreased oxygen supply during

labor, it is difficult to find a specific cause, the report said. Dr. John M. Freeman of Johns Hopkins Hospital in Baltimore, the panel chairman, said people increasingly want to know the cause of defects in their newborns, sometimes in order to attach blame.

'Star Wars' Technology Promises Host of Peaceful Inventions

By Malcolm W. Browne New York Times Service

WHATEVER finally comes of President Ronald Reagan's against nuclear missiles, research at oratories promises a bumper crop of spinoff discoveries and gadgets. many of which will spur progress in medicine, industry and basic sci-

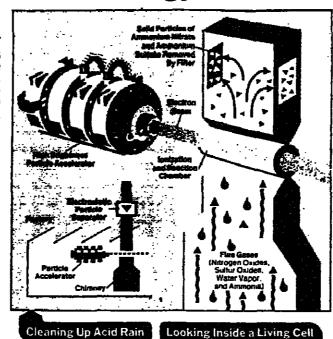

Scientists at such weapons laboratories as Lawrence Livermore in California, Los Alamos in New Mexico and Oak Ridge in Tennessee say their projects will benefit pursuits as arcane as the analysis of supernova explosions and as mundane as the processing of vegeta-bles. Instruments, machines and ideas being developed in connection with weapons programs may help detect cancer in its early stages, screen people for genetic defects, custom-grind contact lenses and win back the America's

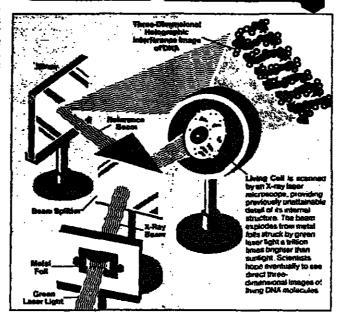

Of the \$100 million the government is expected to spend on Strategic Defense Initiative research in the coming year, most will go for projects having little immediate bearing on peaceful applications. Critics of the presidential initiative argue that the money would be better spent directly on civilian re-

Still, the development of military hardware has often enriched science and technology, and the trend is certain to continue. World War II, for example, speeded the development of jet aircraft, space flight, antibiotics and nuclear energy. Among the spinoffs of the atom bomb program was the creation of an artificial element called americium, the essential ingredient in smoke detectors,

1 HE beams of laser light and charged particles that may one day be used in warfare show particular promise as tools for peaceful research and medicine. A case in point is the deadly X-ray laser, which may soon begin revealing the mechanisms of life in detail.

Military designers are interested in building an X-ray laser weapon, mainly because it could deliver vastly more destructive energy to a distant target in space than is possible using conventional lasers. But producing a cascade of X-rays requires a great amount of energy. One way of creating such energy is to pump the laser with a nuclear explosion. The first bomb-powered X-ray laser was successfully exploded five years ago at the Nevada

"I would guess that we're going to see the first X-ray hologram one or two years from now." Dr. Mathews said recently. "It may be rather crude - perhaps showing just the gross internal structure of a cell. But refinements will come rapidly. and eventually. I think, we'll be able to make holographic pictures even of living DNA molecules, the molecules that make up the genetic

The potential of weapons-related inventions for advancing medical research has become so impressive that private business organizations have begun to exploit them. At Los Alamos laboratory, for example. scientists devised an optical instrument using circularly polarized light. Realizing its commercial potential if it could be adapted to clinical research, a group of busi-ness people paid the laboratory \$4 million in venture capital to develop a marketable product. The rewas an instrument that can make fast, inexpensive assays of viral components of blood.

The development of death-ray technology could also lead to safer fruits and vegetables on supermarket shelves and might even help safeguard the continent's forests from acid rain, scientists say. The tool that could do these things, a powerful miniature particle accelerator called the High Brightness Test Stand (HBTS), already exists.

CCORDING to the machine's developer, Stephen Mathews, also a physicist at Livermore, the HBTS was invented using a system called magnetically switched linear-induction acceleration to produce a very intense beam of high-energy electrons. This beam, in turn, powers a device called a free-electron laser — one of the candidates for development as a space weapon. But Dr. Mathews has conceived some unexpected uses for the accelerator, which is only about six feet long (1.8 meters) and which could be manufactured to sell for about \$1.5 million.

He proposes using the little accommon research tools. But accelerator to kill insects, including cording to Dennis L. Mathews, the Mediterranean fruit fly, larvae celerator to kill insects, including physicist in charge of the Liver- and parasites that infest freshly more project, the goal is in sight. harvested fruit and vegetables. Effects of Iodine Deficiency Cause Alarm in Himalayas

By Erik Eckholm

New York Times Service TEW DELHI - Health ex-1 perts along the southern fringe lack of dietary iodine to wide-of the Himalayas have become spread mental and physical impairalarmed by recent evidence that a lack of iodine in the diet is dooming millions of children to mental and physical disabilities.

The findings are that the damage from iodine deficiency is far worse than previously suspected, and the governments of India, Nepal and Bhutan are adopting emergency

Because of the subtle effects of iodine deficiency on brain development, one international health specialist said, in some of the worstaffected Himalayan villages "nearly half the children appear to be virtually uneducable and unemployable except for the simplest

The mountains and plains of northern India, Nepal and Bhutan have become known in medical circles as the "Himalayan goiter belt." The soils and waters of the Himalayas are so lacking in natural iodine that even the goats develop goiters, the enlargement of the thyroid gland that is the body's adaptation problem. to the deficiency. In some mountain cultures, people with smooth necklines were once regarded as

Health officials have viewed the "goiter problem" as a minor threat the region. Goiters are seldom life-

threatening.
But the new evidence linking the ments is now spurring governments

into more intensive action.

Teams of health workers, often traveling by foot over rugged terrain, are injecting millions of potential mothers with megadoses of iodine. Iodine is crucial to normal development of the brain and central nervous system in the growing fetus and infant.

The governments are now also moving decisively to require the iodization of consumer salt. Earlier in this century, the disorders that resulted from iodine deficiency were largely eliminated in Europe and the United States through this simple measure.

Today, half a billion people in large areas of Asia, Africa and Latin America remain vulnerable to iodine deficiency, according to Dr. John Stanbury, an endocrinologist at the Massachusetts Institute of Technology. He and other experts blame government inertia and ignorance about the severity of the

"The iodine problem is on the subtle side," he said. "It doesn't jump out at you like polio or small-

Worldwide, hundreds of millions of people — 40 million in India compared with the hunger; filth alone, researchers estimate - live 'and epidemic diseases that blight with goiters under their chins.

Brown Boveri play a major role

out nuclear devices.

installing the entire electrical equipment.

Water and power

When completed, the Ataturk hydro power plant in Turkey will have an installed capacity of 2 400 000 kilowatts. Equipped with Brown Boveri generators together with BBC transformers, switchgear and the entire control system, it will be the country's largest power-generating facility.

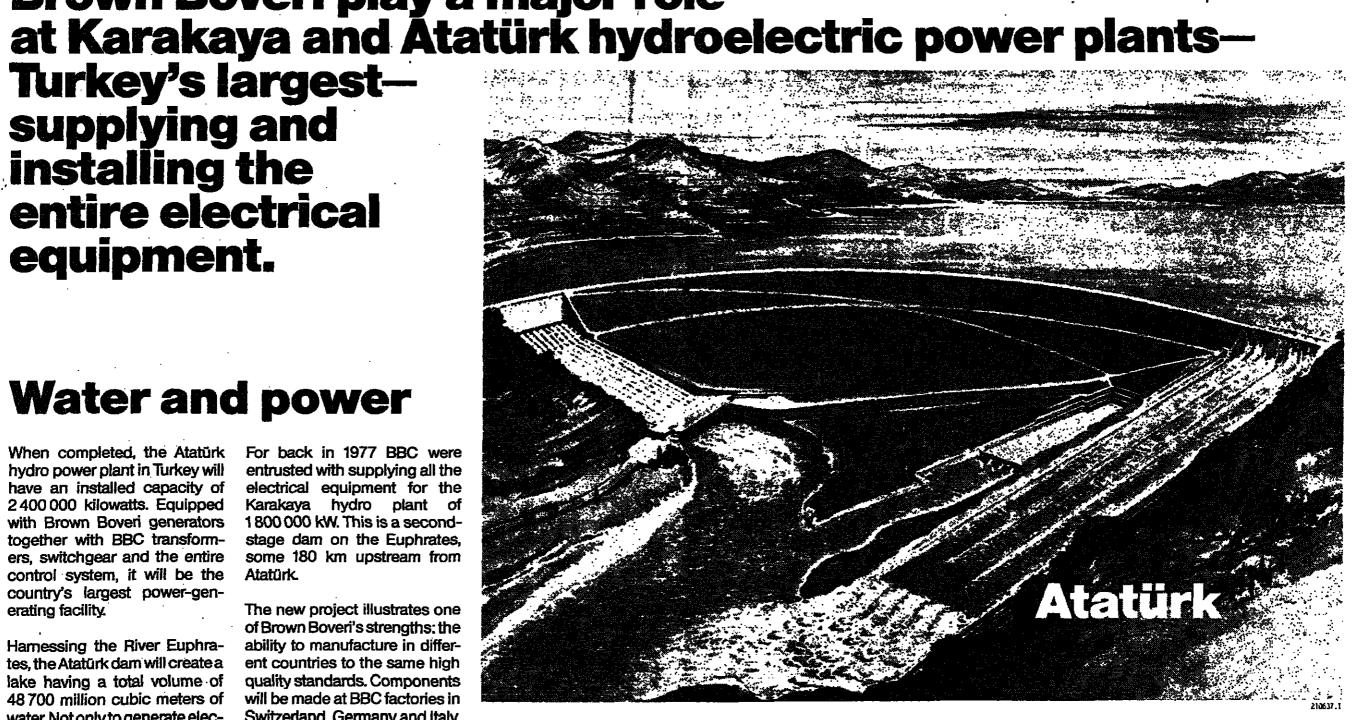

Hamessing the River Euphrates, the Atatürk dam will create a lake having a total volume of 48 700 million cubic meters of water. Not only to generate electricity, but also to imigate a fertile, but still arid, region of Anatolia.

Yet again, Brown Boveri are playing a major role in Asia , Minor.

For back in 1977 BBC were entrusted with supplying all the electrical equipment for the Karakaya hydro plant of 1800 000 kW. This is a secondstage dam on the Euphrates, some 180 km upstream from Atatürk.

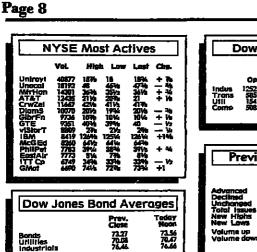

The new project illustrates one of Brown Boveri's strengths: the ability to manufacture in different countries to the same high quality standards. Components will be made at BBC factories in Switzerland, Germany and Italy.

BBC play a major role in providing the world with facilities for generating, distributing and utilizing electricity. And often with such success as to invite a repeat performance.

Competent · Dependable · Worldwide

Prices Lifted by Interest Hopes

NEW YORK - Prices on the New York Stock Exchange staged a broad advance

The Dow Jones average of 30 industrials rose 8.84 to 1,262.70 two hours before the close on Wall Street.

Wednesday, getting a lift from hopes for lower

The NYSE's composite index rose .78 to

Although prices in tables on these pages are from 3 P.M. in New York, for time reasons, this article is based on the market at 2 P.M.

104.10. Volume on the Big Board came to 76.50 million shares with two hours to go.

Gainers outnumbered losers by more than 2-to-1 among NYSE-listed issues.

Interest rates fell in the bond market Tuesday and Wednesday after Paul A. Volcker, chairman of the Federal Reserve Board, expressed some misgivings about the economic outlook.

At a conference of the Export-Import Bank on Tuesday, Mr. Volcker said that overall growth might falter because of problems afflicting the manufacturing, mining and farming sectors of the economy Analysts said that his comments did not have

upbeat connotations for the near-term outlook But they added that traders interpreted his

remarks as a signal that the Fed was likely to are 100 basis points in one percentage point.)

follow a credit policy that encouraged lower interest rates.

At midday, Uniroyal led the active list, up % at 18%. A New York financier, Carl C. Icahn, said he planned an \$18-a-share offer for control

Irving Reports Rise in Net

NEW YORK — Irving Bank Corp. reported Wednesday that first-quarter net was \$27.3 mil-lion, a 2.2-percent increase from \$26.7 million in the corresponding 1984 period.

living said the improved earnings mainly reflected higher net interest income, on a fully taxable basis, and higher non-interest income.

Those favorable factors were partly offset by igher non-interest expenses.

Net-interest income on a fully taxable basis increased 7.3 percent to \$133 million in this year's first quarter from \$123.9 million in the

The increase was due primarily to a widening in the net interest-rate spread and a higher average volume of interest-earning assets, main-

There was an 18-basis-point increase in the net interest-rate spread to 3.20 percent, primarily because of a 22-basis-point widening in the purchased-funds margin and an increased volume of net non-interest-bearing funds. (There

WALL STREET WATCH

Mid-1985 Recession Seen To Be Bullish For Stocks

By EDWARD ROHRBACH

ARIS --- As all battle-scarred investors know, it's war out there. So how do you outflank a stock market that takes no prisoners? Advance warning helps, especially intelli-gence about direction in which the U.S. economy is

Here's a report from the war zone by Francis H.M. Kelly, research director and chairman of the investment policy committee at Oppenheimer & Co.:

"The ominous moment in forecasting comes when the random blips on the economic radar screen fuse into the picture of an enemy flotilla in battle formation. The opening months of 1985

Investors who think

there is a full retreat

from Wall Street are

fighting the last war.

produced a lot of blips that should have sent warnings to those who have been anticipating a healthy cyclical expansion for the balance of the

But investors who think this signals a full retreat from Wall Street are fighting the last war, Mr. Kelly contends. He is pre-

dicting a recession that will "not carry the presumed connotation for equity prices." Rather it will be very bullish for stocks. His logic rests on the "unique nature of this slowdown" - not the result of "scarce money" that he pointed out is normally the culprit as the Federal Reserve acts to squeeze out inflation - but

the fault of the dollar. Its strength has made America the "dumping ground for foreigners' exports," he asserted, at the expense of U.S. industry. The recession should hit about mid-year, prompting the Fed to embark on an aggressively expansionist monetary policy." he said. "Then equity prices are likely to be powerfully and positive-

ly influenced by the growing conviction that short rates and dollar exchange rates will fall sharply." With more liquidity available than usual to fuel stocks as the market anticipates an economic recovery. Mr. Kelly foresees a breakthrough past Wall Street's record highs to "gains 25 to 30

The types of stocks he thinks will perform best are "energy, cyclical capital goods, intermediate processing, high technology, capital goods and multinational stable demand" issues.

Harry Zisson, research director and economist at Thomson McKinnon, measures the start of an offensive against the Dow average's 1,300-barrier in weeks rather than months. However, he sees the drive stalling between there and 1,400 "by summertime," when he thinks investors should move to more "defensive posi-

UT where the two cross swords is over the U.S. economy. Mr. Zisson views current business activity as strengthening, powered by monetary stimulation from the Fed for six months last year through January. He expects a mild recession in late 1985 or early next year as this liquidity wears off and interest rates and inflation rise in an economy operating at full capacity.

His top stock picks are Atlantic Richfield, General Electric,

Emerson Electric, Warner-Lambert, Squibb, American Home

Products, NCR and Pitney Bowes. If heavy smoke is obscuring events on the battlefield, Thomas B. Stiles, research director at E.F. Hutton, has an explanation. Of course, Wall Street is frequently confusing and contradictory," he said, "but it is even more so now as the prevailing

consensus breaks down and a new viewpoint develops. He noted that early in the year belief was widespread that the economy would continue to gather momentum, prompting the Fed to "lean against the wind" and push interest rates higher. Mr. Stiles advises a "reflect-now-and-act-later" approach to investing while the market decides which way it wants to go. He

OPEC's Output **Dropped**

Ceiling Held In First Quarter

LONDON — Crude oil produc-tion probably hovered just below the OPEC official ceiling of 16 million barrels per day during the first three months of 1985, Petroleum Intelligence Weekly said Wednes-

day.

Preliminary estimates indicate that first-quarter production was 15.8 million barrels per day, down 5.7 percent from 16.7 million bar-

5.7 percent from 16.7 milion bar-rels per day in the first three months of 1984.

The oil industry newsletter said that output by the Organization of Petroleum Exporting Countries was at very low levels in January, probably breached the ceiling in February and tapered off to the official level in March.

It put current output at about 16 ullion barrels per day. Earlier, Oil Minister Subroto of

Indonesia estimated the cartel's 1985 production at 17 million bar-rels per day, down from 17.2 mil-

OPEC lowered its production ceiling from 17.5 million barrels per day last October in the face of slack demand.

The newsletter said that Iran's production fell below two million barrels per day in March after reaching the country's quota of 2.3 million barrels per day for a time in February. Iran averaged two mil-tion barrels per day through Febru-

Output by Saudi Arabia was about 4 million barrels per day in March, 353,000 barrels below its OPEC daily ceiling, and has held at that level, the newsletter said.

Both Iran and Saudi Arabia averaged well below their respective quotas during the quarter as a

According to the newsletter, Kuwait said it exceeded its daily quota of 900,000 barrels in January and February by about 70,000 barrels because of higher-than-expected output from the neutral zone. But Kuwait adjusted its production downward last month. The United Arab Emirates was

estimated to be exceeding its quota of 950,000 barrels per day by about 100,000 barrels per day. Production in Nigeria, with a daily quota of 1.45 million barrels

day, recovered dramatically from the 1.37 million barrels per day in January.

could run well above 1.6 million market was not likely to change, because of greater volumes of crude and refined products and an

increase in the number of tankers and refineries worldwide. He warned that a slight pricedrop could be triggered if, for ex-

ample, North Sea oil prices are allowed to fall to spot levels and if Nigeria's prices followed suit.

Budd Uncouples Rail-Car Division

Thyssen Steers U.S. Subsidiary Back to Black

By Daniel F. Cuff New York Times Service

TROY, Michigan - After Thyssen AG, the big West German steelmaker, bought Budd Co. here in 1978, its new American possession was hit by an unexpected one-two punch.

First, the side of Budd that makes automotive products faltered when Detroit's business fell off. And the manufacturing side of Budd that makes passenger rail cars was hurt when the company tried to expand the business rapidly to make up for the automotive slump.

Budd was suddenly in trouble, leaving its new owner to wonder just what it had bought. Many European Investments

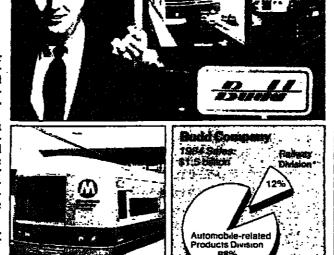

in the United States in the last decade have had similar struggles.
They are as diverse as Schlumberger Ltd.'s problems with Fair-child Semiconductor Co., Ten-

Warenhandelsgesellschaft's with its Great Atlantic & Pacific Tea Co. supermarket chain, Elf-Aquitaine with Texasgulf Inc., and Imperial Group PLC with Howard Johnson Co. Some have all but given up

Imperial, for example, has said it is considering the sale of Howard Johnson. But others are determined to hang on. Thyssen, despite the misfor-

tunes, has been working to improve its American company and has made some major structural During a recent visit to New York, Dieter Spethmann, Thys-

sen's chief executive, said, are happy with Budd." Mr. Spethmann did not say so,

James H. McNeal Jr., Budd Co.'s chief executive, and a Metro-North commuter railroad car made by Budd.

but Thyssen may be happier with the auto-parts business, which has returned to profitability as a slimmer and more quality-con-scious operation, than with the rail car business, which is still losing money.

To make the two operations more distinct. Thyssen at the start of the year broke off the rail car operation, which is now called Transit America Inc. and has the distinction of being the only surviving rail-car builder in the United States.

The future of Transit America does not seem bright, however. There are 14 foreign rail-car makers, most operating with governmental subsidies in one

ca has lost out on the last 13 railcar contracts awarded in the United States.

Thyssen has brought in Hans U. Wolf from West Germany as chairman and president of Transit America, which operates from its Red Lion Road plant in Phila-

At Budd, the breakoff of the money-draining transit opera-tion seems to have brought a measure of relief.

The buyers of passenger rail cars for subways and railroads are mostly public authorities and the political overtones involved are not to every businessman's

\$306-Million Bid Made by Icahn to **Control Uniroyal**

NEW YORK - A group led by Carl C. Icahn announced Wednes-day a hostile, \$306-million tender offer for a controlling interest in Uniroyal Inc., one of the largest was rebuffed. He also said he had rubber makers in the United States. The Committee for the Protec-tion of Shareholder Rights offered

to pay \$18 a share for more than 50 percent of Uniroyal's 34 million shares outstanding. In newspaper advertisements, the group said the offer would be

effective next week and would be conditioned on the defeat or withdrawal of anti-takeover proposals scheduled for a shareholder vote at Uniroyal's annual meeting April

Mr. Icahn, a New York financier who owns about 10 percent of the chemical, plastics and rubber prod-ucts company, said that if the offer is successful, he would merge Uniroyal into one of the companies he controls. Mr. Icahn's group said that it would give \$18 worth of securities to the shareholders who do not tender their shares.

After the announcement, Uniroyal stock led the list of most actively traded issues on the New York Stock Exchange and at midday Wednesday was at \$18.625 a share, up 75 cents from Tuesday's

Mr. Icahn's group has launched a proxy fight in an attempt to thwart Uniroyal's management from putting into effect certain anti-takeover measures, including the staggering of the terms of the company's 12 directors. Mr. Icahn has said he believes the measures would inhibit the rights of share-

He added that some of the prin-

cipals in the brokerage firm were the same as those in Asset Manage-

The ESM failure led to a run on

bid for Phillips Petroluem Co., said his group had offered to acquire all the financing to complete the pur-

In addition, Mr. Icahn said he would not sell his 3.16 million Uncompany before the annual share-holders meeting or afterward, if the anti-takeover measures were dethe same offer to all shareholders.

The anti-takeover, or so-called "poison pill" proposals would stag-ger terms of directors, require 80percent shareholder approval to remove directors, amend bylaws to permit shareholders to full board vacancies or increase board size. require a similar vote to amend the anti-takeover proposals and related bylaws or to approve a merger and eliminate shareholder rights to act by written consent. Uniroyal, based in Middlebury,

Connecticut, has 34 million common shares and 611,141 first preferred shares outstanding, each of which is entitled to one vote at the

annual meeting.
Uniroyal earned \$77 million, or 2.31 a share, on sales of \$2.12 billion last year.

In March, Mr. Icahn agreed to drop his \$8.06-billion bid for Phillips after the oil company sweeted its competing offer to share-

Phillips agreed to pay \$25 milhon of his expenses and Wall Street analysts estimated his pretax profit from the pursuit of Phillips at be-tween \$50 million and \$60 million.

Thrifts See Little Effect From Bevill's Troubles

By Pamela Brownstein

The Associated Press
NEWARK, New Jersey — Despite a small run on one New Jersey thrift, several savings and loan associations say they don't expect their financial standings to be affected by the bankruptcy filing this week of a government securities

The Federal Reserve Board in Washington said no problems were reported at financial institutions after the filing by Bevill Bresler & Schulman Asset Management Its daily output in February was

FRANKFURT - Talks concerning the acquisition of a majority stake in Domier GmbH by Daimler-Benz AG have reached an intensive phase, Daimler officials said Wednesday.

But Daimler officials, who asked not to be identified, cautioned that although they are "hopeful" about gaining majority control of the family-owned Dornier group, they do not foresee a decision by Dornier's six family shareholders before the month's end

Dornier's shareholders were unavailable for comment Wednesday. Sources at Daimler's headquarters in Stuttgart said several months of "sensitive" discussions between the automaker and Dornier's owners have yet to produce a definitive answer from the shareholders whether the group is prepared to sell any portion of its

A majority stake in Dornier, West Germany's second-largest aviation and aerospace group, which is expected to report 1984 sales of around 1.6 billion Deutsche marks (\$507 million), could fetch up to 500 million DM from prospective buyers, analysts said. Sensitivity about the talks stems from what is understood to be a

family rift over the direction of

Dornier between a group of share-

ITT to Buy NTT Telephones

RALEIGH, North Carolina -ITT Corp. said Wednesday that its business and consumer communications division ordered 10,000 telephones from Nippon Telegraph & Telephone Corp. of Japan. Delivery of the telephones will be to Dornier to continue its existing completed by the end of April No

holders led by Claudius Dornier, 70, and another led by his stepbrother, Justus Dornier, 48.

Claudius Dornier has recently indicated his desire to sell his 12.8percent stake.

Observers speculate that Claudius Dornier's brothers, Peter and Silvius, with 8.2-percent and 12.8percent stakes, may also be interested in selling their shares to Daimler. The fate of the 27.8-percent share of Anna Dornier, the widow of company's founder, Claude Dornier, who died last year, remains clouded.

A takeover of Dornier, based in Friedrichshafen, would strongly underpin Daimler's efforts to secure a foothold in acroengines, avi-ation and various high-technology fields, Daimler sources said. Such diversification, officials said, would help offset anticipated further stagnation in the European heavy-truck market, an area in which Daimler is dominant.

In February, Daimler announced that it had acquired full control of MTU Motoren-und Turbinen-Union München GmbH, a maker of airplane and automotive engines with annual sales of 2.2 billion DM.

Daimler previously had held a 50-percent stake in MTU, as did Maschinenfabrik Augsburg-Nürnberg AG. Analysts estimate Daimler paid MAN 500 million DM for The government of Baden-Würt-

temberg, the state in which both Daimler-Benz and Dornier are based, has said it hopes to see a "Baden-Württemberg solution" to any new configuration in Dornier's ownership.

The Bavarian premier, Franz Josef Strauss, is understood to want operations in Munich and to expend them in Bavaria.

Mohawk Data. Datapoint Corp. To Merge Units

New York Times Service

NEW YORK - Datapoint Corp. and Mohawk Data Sciences Corp. said they would combine their computer-services businesses in a two-step transaction. They declined to put a value on the accord.

The two companies said Datapoint would spin off its service business to shareholders on a tax-free basis, creating a new, publicly traded subsidiary. The subsidiary would then buy Mohawk's customer-service division for an undisclosed price,

The transaction would bring together two companies controlled by Asher B. Edelman, the New York financier. Both companies have encountered fi-nancial difficulties recently. If approved by both boards

the transaction would create the

largest third-party service con-

cern in the computer industry, with revenues of more than \$200 million, according to Edward P. Gistaro, Datapoint's president and chief executive. It would also allow the cashhungry Mohawk to pay a substantial portion of its \$140-million bank debt, according to

Francis P. Lucier, Mohawk's

Unocal Shares Tumble On Takeover Rumors

By Robert J. Cole
New York Times Service
NEW YORK — Shares of Uno-

cal Corp. slid \$1.75 Tuesday, to \$48, in heavy trading amid Wall Street rumors that the company might try to buy another major oil producer to frustrate a takeover attempt by a group led by T. Boone Pickens, the chairman of Mesa Pe-

troleum Corp.
The company most widely mentioned as Unocal's possible target is Diamond Shamrock Corp. of Dallas. Diamond Shamrock's stock climbed \$1.25 on the rumor, to \$20.50, also in heavy trading.
Only three months ago, Diamond Shamrock broke off a \$3.3-

billion merger transaction with Occidental Petroleum Corp., but lest little doubt that it was still open to other merger talks. Based on the Occidental talks, Diamond Shamrock appeared to be on the block for about \$25 a share. Neither Unocal nor Diamond

Tuesday's market rumors, but ana-

lysts said that nothing should be read into the silence. Such rumors

Mr. Pickens, who heads a group that owns 13.6 percent of Unocal stock, said Sunday that he would pay \$54 a share, or \$3.46 billion, for enough stock to give him 51-percent control of the company

Tuesday, however, Wall Street traders began lightening their stakes in Unocal over fears that Mr. Pickens might have difficulty raising money for the takeover or might even resort to "greenmail" that is, sell his huge stake in the

company back to Unocal. A key ingredient in Wall Street fears, traders said, is the possibility that Unocal might slow Mr. Pick-ens by buying another company. As analyzed by traders with mil-lions of dollars at stake, if Unocal

were to issue, say, 75 million shares to buy Diamond Shamrock, Mr. Pickens's cost to buy Unocal would jump at least \$4 billion. Such an increase in Unocal's price would probably put the company beyond Mr. Pickens's reach, analysts say.

Wall Street analysts estimated that Unocal's stock price would drop to \$38 or \$40 if Mr. Pickens withdrew or were defeated.

Mr. Pickens could not be reached for comment but a close Shamrock would comment on associate, David H. Batchelder, voiced confidence that the funds would be raised. He said investors would commit the first half of the are commonplace on Wall Street, \$3 billion being sought by the Wall and companies rarely comment on Street house of Drexel Burnham Lambert Inc. by Friday, collecting \$11.25 million in commitment fees for the money.

In a separate development, Upocal said in response to questions that Goldman, Sachs & Co. and Dillon, Read & Co., had been retained as financial advisers.

J.P. Morgan Net Increased 12.7% In First Quarter

United Press International NEW YORK - J.P. Morgan & Co., parent of Morgan Guar-anty Trust Co., the fifth-largest bank in the United States, said Wednesday that first-quarter earnings rose 12.7 percent from a year earlier, to \$164.6 million, or \$1.85 a share, from \$146 mil-

lion, or \$1,66 a share. Lewis T. Preston, chairman, told shareholders at the corporation's annual meeting that Morgan increased its primary capital by \$500 million in the past 12 months, to \$4.7 billion.

Much of Morgan's earnings increase came from higher net interest earnings and from a lower provision for credit losses that were offset by lower earnings in most non-interest sectors, he said. Net interest income rose to \$428.5 million from \$372 million in the 1984 first quarter.

Provision for possible credit losses was reduced to \$30 million from \$45 million a year ago. The total allowance for possible credit losses stood at \$598 million on March 31, compared with \$509 million a year

Non-accrual loans, those on which little or no interest is being paid, rose to \$870 million from \$604 million a year ago.

Chase Manhattan to Buy 2 Ohio Savings Banks

Compiled by Our Staff From Dispatches COLUMBUS, Ohio - Chase Manhattan Corp. announced Wednesday that it will acquire the Mentor Savings Bank of Mentor, Ohio and the Federated Savings Bank of Cincinnati for a combined price of \$7.4 million.

Arthur F. Ryan, an executive vice president of Chase, said his institution will pay \$6.8 million for the Mentor thrift and \$600,000 for the Cincinnati savings and loan, He said Chase has received state approval to acquire the two institutions and has filed applications with the Federal Reserve Board and the Federal Savings and Loan Insurance Corp. for final approval.

Mentor Savings Bank has assets of \$114 million and 25,000 accounts. Federated reported assets of \$53 million and 7,300 accounts. Mr. Ryan said Chase will seek state legislation to permit it to operate as a commercial bank in Ohio. In that case, he said, the two thrift units would be merged under

the Chase umbrella. "We see these acquisitions as a first step in helping resolve the sav-ings-and-loan problem in Ohio," Mr. Ryan said. "We believe we can offer competitive rates."

In other developments, the president of the collapsed Home State Savings Bank and three other top officers have been dismissed by the state-appointed conservator who has taken over operation of the closed savings and loan.

hired attorneys representing conservator Arlo Smith, said Tuesday that the executives were dismissed. before Mr. Smith filed a lawsuit against Home State's owners and executives. He said the firing was because of the conservator's allegations against them.

"I think when you're going to allege that they've done things wrong and cost the institution \$140 million, it's inconsistent to keep them on the payroll," Mr. Har-

The conservator has charged that negligence or improper actions by management led to the March 8 collapse of Home State, a Cincin-nati-based thrift with 33 offices in southern and central Ohio.

Chemical New York Corp., parent of Chemical Bank, has signed a letter of intent to acquire Home State for undisclosed terms. State officials have said the sale could be completed this week.

At its meeting Tuesday, the board also authorized the Ohio Department of Commerce to hire the investment banking firm of Kidder, Peabody & Co. for \$200,000, plus up to \$50,000 in expenses, to advise on terms of the sale of Home State, perhaps later this week, to Chemical New York Corp.

Thirty-nine state-chartered savings and loans have reopened since Governor Richard F. Celeste closed 70 on March 15. (UPI, AP)

FCA Rejects Offer By Former Chief

LOS ANGELES - Financial Corp. of America has rejected an offer by its former chairman, Charles W. Knapp, to buy more raise about 116.5 million dollars, a than \$1 billion in problem loans

written while he headed the firm.
In a letter Tuesday, the FCA
board made it clear that its current management was not interested in doing further business with Mr. Knapp. The board removed Mr. Knapp from his job with the company last summer during a \$6.8billion run on its subsidiary, American Savings & Loan Association.

Mr. Knapp's group, Trafalgar Holdings Ltd., said it was "disappointed that the company considers us adversaries and has summarily rejected the offer,

Goldsmith Bids for 70% of Zellerbach Crown Zellerbach's stock, which was \$29 in mid-December when Sir

NEW YORK — Sir James Goldsmith, the British industrialist, on Wednesday made a formal offer for as much as 70 percent of Crown Zellerbach Corp. at \$42.50 a share, if the company withdraws a complex anti-takeover provision.

The offer caps a four-month-long campaign by Sir James and came as Zellerbach's board of directors was scheduled to meet.

The proposal states that if the anti-takeover provisions were not revoked, Sir James still would seek to amass stock in the paper and forest products company, but only if a minimum of 51 percent of the stock is tendered.

Under that circumstance, the offer said, Sir James would not be bound by the \$42.50-a-share price particularly since there appears to or other terms of the offer and he be no alternative plan of disposi-would not commit himself to further purchases.

HUMAN RESOURCES

UNDINAIUN

Arabian Gulf

Attractive Tax-Free Salary

We are the Offshore Operations Division of Qatar General Petroleum Corporation located in one of the more pleasant parts of the Arabian Gulf, where expatriates and their families can combine challenging work opportunities with a family lifestyle and first-class benefits.

We are currently looking for a Senior Personnel professional to be Human Resources Co-ordinator and to manage the Personnel Division responsible for recruitment, manpower planning, salary administration and staff development, with special emphasis on Qatari employees. Reporting to the Personnel Manager the selected candidate, aged 35 to 45, must have a proven track record in the activities listed above and be able to demonstrate the relevancy of his experience in manpower planning and development systems including the determination of training needs. In particular he will need to have an enterprising approach to the development of Qatari staff in line with the objectives of the Corporation. In addition to managing these activities he will also be responsible for job classification, recruitment and salary administration.

The successful applicant will be a University Graduate with not less than 12 years'experience in the Personnel function, several years of which will have been in the Middle East. A knowledge of Arabic is desirable.

This is a married status position with an excellent benefits package, including free accommodation, 37 working days leave per annum, subsidised local or boarding school fees, free medical cover and outstanding recreational facilities.

Interested candidates should send full career details with a contact telephone number quoting reference number L2528 to Anne Weisflog. Lansdowne International Services Limited, 37 Golden Square,

Qatar General Petroleum Corporation

INTERNATIONAL RECRUITMENT CONSULTANTS

ercorbeitung aktiv ist, arbeiten wir seit mehreren Jahren ertolgreich im Sektor der Medizintechnologie Dabei wurde u. a. ein Verfahren zur berührungsfreien Zerkleinerung von Nierensteinen durch Extra-Corporal erzeugte Stosswellen entwickelt, das in der internationalen Fachwelt eine sehr starke Nachfrage auslöste und die Basis für eine Familie medizintechnischer Geräte bildet. Für die systematische Erweiterung der internationalen Vertriebsaktivitäten suchen wir den

Vertriebsbeauftragten Fernost

mit voraussichtlichem Standortschwerpunkt in Japan und Aktivitäten in Südkorea, Taiwan; ggf. Australien und

Vertriebsbeauftragten Nahost

mit Sitz in Kuweit oder den U.A.E.

Die Aufgabenstellung umfosst jeweils die Erarbeitung und Umsetzung spezifischer Strategien zur Realisierung der Umsatzziele, dabei insbesondere Aufbau und Pflege von Kontakten zu medizinischen, politischen und administrativen Entscheidungsträgern sowie den Direktvertrieb von Geräten und Serviceleistungen bis zum Vertragsabschluss einschliesslich erforderlicher Finanzierungsmodelle.

Wichtig für die erfolgreiche Wahrnehmung einer derartigen Funktion ist die ländergruppenspezifische Vertriebser-fahrung, möglichst erworben im Klinikmarkt für Grossgeräte, in Verbindung mit den entsprechenden verhandlungssicheren Sprachkenntnissen

Eine solide Basisausbildung als Wirtschafts- oder Naturwissenschaftler bzw. Ingenieur ist in jedem Falle vorteilhaft. Wenn Sie eine dieser Aufgabenstellungen reizt und Sie als erfolgsorientierter Vertriebsmann die seltene Chance wahrnehmen möchten, in einer frühen Phase zum Erfolg einer zukunftsorientierten medizintechnischen Gerötefomilie beizutragen, senden Sie uns bitte Ihre aussagefähige Bewerbung, oder fordern Sie vorab unseren Personalfragebogen on.

The United Nations Children's Fund (UNICEF) With Headquarters in New York and offices throughout the world, working with developing country governments to provide disadvantaged children and their mothers with the basic services they need to survive and develop seeks

SENIOR POLICY SPECIALIST-CHILD DEVELOPMENT New York (USA) - (Ref.: VN 470)

Responsibility to provide professional support to Field Officers in early childhood development activities within the framework of comprehensive approach to survival and development of the child; to contribute to the development of policies and programming strategies for Unicef activities.

Qualifications: Post graduate university degree in behavorial sciences or related specialized subjects; additional training in subjects related to early childhood development leading to a broad understanding of child development issues, 12 years of work experience, partly in policy and program development, with substantial experience in developing countries. Proven ability to work effectively in an advisory capacity required. Familiarity with other international organizations particularly with their programs affecting early childhood development will be an advantage. Fluency in English and preferably in one other UN language; ability to write reports and position papers in clear and readable language.

Salary commensurate with qualifications and experience. Excellent benefits package.

Send detailed resume with an example of published professional writing to:

MICHAEL K. CORBETT Chief Recruitment and Placement UNICEF, 866 UN Plazza, New York, NY 19817, USA.

THE INTERNATIONAL MANAGER
A WEEKLY GUIDE BY SHERRY BUCHANAN
WEDNESDAY IN THE IHT

HI-TECH SALES PROMOTION EXECUTIVE **JAPAN**

This position will be headquartered in Tokyo, Japan. The successful candidate will have lived in this part of the world. He should have intimate knowledge of the economic and political environment and above all have a good understanding of the motivational and related aspects in dealing with business executives and customs in the area. A working knowledge of the Japanese language, as well as English, is essential. With regard to his educational background, we are looking for a graduate engineer with solid business and marketing experience, or conversely a business graduate with extensive technical activity exposure.

Our company has enjoyed spectacular growth and excellent profits for over 50 years. Today, we are the recognised world leader in our field of metallurgical specialties, both technologically, thanks to a number of important breakthroughs, as well as in terms of products and marketing innovation. We have a diverse customer base covering all industry sectors, have our own manufacturing facilities and are very research-oriented.

We are seeking a young, dynamic executive with a strong business orientation and successful management experience in a technical field. Someone who combines a high degree of intelligence with a pragmatic approach to complex marketing and business problems.

Above-average compensation will be offered to the right candidate.

Please reply in confidence, giving business experience, personal data and salary history to: Box No. D2145, Herald Tribune, 92521 Neuilly Cedex, France.

THE COURT OF A STATE OF A TOTAL OF A STATE O

REFINERY **MAINTENANCE MANAGER**

Overseas Assignment

An internationally respected E&C firm has an immediate opening for an engineer who has a strong background in petrochemical refinery maintenance management. The first months of this assignment will be spent in our Southern California headquarters where you will be involved in developing a comprehensive

After completion of the planning stage, you will be relocated to an overseas location and assume overall responsibility for the management of all refinery maintenance operations. You must have a degree in petroleum engineering along with a thorough knowledge of refinery operations, including start-up, shut-down, parts, tools and equipment needed for an efficient maintenance program.

In addition to modern living accomodations, we will provide full travel and moving expenses, generous overseas salary, frequent post leaves, and excellent potential for advancement. Interested applicants should forward their resume in strict confidence to:

> BOX D-2143 International Herald Tribune. 92521 Neuilly Cedex. France.

acb

International sales engineer

For its «Underwater systems and Equipment Department » located in Marseilles (France).

Frequent trips abroad. - Responsibilities will include:

Knowledge and evaluation of the market with clients. • Negotiations. • Financing
Our team would welcome:

Engineer or Business graduate

5 to 10 years in Technical sales (preferably offshore). Fluent English required; French appreciated; Other languages a +. Should you be interested in such a challenging and attractive position, please send CV + turms, photo, handwritten letter, to our adviser: AJCR

19th CRESH | 19th CRESH | 19th Fifth CRESH | 19th Fifth CRESH | 19th C WASHINGTON — The entry of a new Japanese cargo airline will seriously erode the ability of U.S. airlines to compete on the busy transPacific route, according to industry officials.

Representatives of Los Angeles-based Flying Tiger Line complained Tuesday to the International Trade Commission that the structure of the new Nippon Cargo Airlines, owned primarily by Japanese shippers and freight forwarders, will unfairly increase Japan's dominance of the huge U.S.-East Asian cargo market.

The officials of Flying Tiger, the largest American cargo carrier flying between the United States and Japan, added that the Japanese already have a complex web of restrictions on U.S. air-cargo carriers doing business in Japan.

"We are willing to do whatever is necessary to be able to compete with any other carrier, U.S.

be able to compete with any other carrier, U.S. or foreign, provided the competition is fair," Peter Hubbard, Flying Tiger's senior vice president for sales and service, said.

Mr. Hubbard and officials from other air-Mr. Hubbard and officials from other aircargo, ocean-shipping and air-charter companies testified at the commission hearing on how the cargo-transportation industry affects trade between the United States and Japan.

Nippon Cargo sought U.S. approval last year to operate regular flights between Tokyo, San Francisco and New York. The Reagan administration has not yet decided the matter.

Flying Tiger, which operates 19 Boeing 747 jets, told the commission that because Nippon Cargo is owned by major Japanese shippers and freight forwarders that control virtually all of the air cargo originating in Japan, it would the air cargo originating in Japan, it would likely be assigned an unfair proportion of new

air shipments.

Flying Tiger officials also contend that Japanese government guidelines that require Nippon Cargo to cooperate with Japan Airlines could further affect the amount of cargo available to U.S. companies.

Japan Airlines controls nearly 50 percent of the trans-Pacific air-cargo market. U.S. carriers have a 39-percent market share, of which Flying

Tiger has 27 percent market share, or which Flying Tiger has 27 percent.

Cyril D. Murphy, vice president of international and governmental affairs for Flying Tiger, said in an interview that, without greater flexibility for his company to operate in Japan, "Ten years from now, we'll be an insignificant part of the marketplace."

stringent cost cutting.

Distillers was willing to take the six-week strike — before accepting a compromise that met at least some of its demands — because company officials have an entirely

different perspective.

To be sure, Distillers — the country's fifth-largest company — is relatively prosperous, However, company executives regard the cern as a minnow marshaling all of its resources to defend a strong --- but tiny --- home market while expanding its barely measurable niche in a competitive world dominated by other spirits.

"I had an image of a very settled industry because it's been going on for hundreds of years," said James Twomey, the executive Distillers plucked from a nearby Mitsui Chemicals plant to manage the complex here in 1982. "Actually, there's much more change going on here than at Mitsui."

MIDLETON, Ireland — Al
All of the change — marketing initiatives, new product development and restructuring of distribuard Burrows, the 38-year-old manthough some Irish drinkers give up tion — is aimed at recapturing past aging director who tuns the whiskey for Lent, Irish Distillers glory. Exports account for 60 per-company from Dublin.

And in the United States, which ning of the pre-Easter religious ob- market, Irish whiskey last year sold just live-tenths of 1 percent of the whiskey total.

Ireland dominated the whiskey trade in the 19th century, but a number of factors have eroded that preeminence, including the de-structive effect of years of domestic strife as Ireland fought for its inde-

drivers could not accept and company enjoying record sales and profits needed to resort to such dealt another blow. Sales of the spirit plummeted and its image was spirit plummeted and its image was ing concoctions that they advertised as Irish whiskey but which bore little resemblance to the real product.

To make matters worse, Irish distillers did not foresee the end of Prohibition. Unlike the Scots, they had little set aside to offer the huge American market when the ban was lifted. With a product that takes 7 to 15 years to age before it can be sold, a quick recovery was impossible.

The important turning point came in 1966 when the surviving distillers in the Republic merged to form the current company. By then, they had not only lost most of their export market but faced a new import threat from European dis-

visions at \$3.15 million v5 \$254 million, net charpeotis of \$1.35 million v5 \$249 mil-ilon, and asso-performing as-is sets of \$524 million v5 \$476 million, 1945 net includes charge at \$1 million from obstant margas, and gain of

nearly half the newsstand price on a one-year

Another major piece fell into place between 1972 and 1974, It was then that Distillers acquired Old Bushmills, the last surviving distiller in Northern Ireland, from Charrington, the British brewer, in an accord in which Seagrams of Canada acted as intermediary and ended up with a 14-percent stake in

Seagrams today acts as importer in North America for Jameson whiskeys, Distillers' leading brand in the American market, and is a frequent partner in the exchange of technical information, according to Mr. Burrows.

Industry analysts believe Distillers is finally on the right track While Scotch whiskey sales have slumped in the United States and other world markets, the sales of the Irish spirit have managed to xpand. And while 18 percent of Irish whiskey is still sold around St. Patricks Day (this year's supplies were shipped before the strike), Distillers maintains that yearround consumption is expanding.

It has not been easy. Distillers has endured a one-third decline in its home market since 1979 largely due to the imposition of high liquor taxes. Some Irish drinkers cut back while others turned to Scotch and

"Our competition is the whole tillers and brewers as Ireland pre-pared to join the European Community and pull down protective Scotch but high quality gin, vodka, and Cognac," said Mr. Burrows.

Recession May Be Bullish For Stocks

(Continued from Page 9)

said the key to an advance by stocks will be "superior performance" in the bond market.

"Until then, we could well be buffeted by the crosscurrents of disappointing earnings and sagging confidence about the 1986 outlook," he said. "The long-term case for equities remains impressive, but it is overwhelmingly a valuation case dependent on both lower rates and an extended cycle."

Michael Ponsbach, partner in charge of Stockholm's Jacobson & Ponsbach brokerage firm, also sees a period ahead of rest and recuperation for investors worldwide. "There's just a general lack of interest now about stock markets, from Wall Street through Europe and including Japan," he said.

Japan Said to Set Export Levels for 3 Automakers

TOKYO - Ministry of In-ternational Trade and Industry officials have described as speculation a report that it has proposed limiting car-export in-creases to the United States to 13 percent or less for three large Japanese automakers.

The newspaper Nihon Keizai Shimbun, citing informed sources, said MIII proposed raising the limits by 11 percent to 13 percent for Toyota Motor Corp., Nissan Motor Co. and Honda Motor Co. in the year that began April 1.

The newspaper said that meant MITI would give larger increases to smaller automakers that have contracts to sell cars to U.S. auto companies. It said MITI was expected to make its quota proposal to five smaller automakers later. Company spokesmen said

they knew nothing of any pro-posal. MITI officials said they had not decided on new allocations for the eight automakers. The Japanese government has increased the ceiling on car shipments to the United States

by 24.3 percent to 2.3 million in

the year that began April 1.

CONTINENTAL DRIFT

By Russell Banks. 366 pp. \$17.95. Harper & Row, 10 East 53d Street, New York, N. Y. 10022. Reviewed by Michiko Kakutani

Carl HIS is an American story of the late 20th century," writes Russell Banks in the Faulknerian invocation that opens "Continental Drift," and this remarkable novel goes on to fulfill that ambitious introduction - in the largest sense. Sweeping in narrative and vivid in its depiction of fragmented, fragmenting lives, "Continental Drift" accelerates like a fast, sleek railroad train to its swift conclusion, but Banks's sure command of plot proves to be only one of many novelistic tools employed in the service of a larger vision.

Like Graham Greene and Robert Stone, Banks is concerned with moral ambiguities and their consequences on ordinary lives, and his tale of how one man named Bob Dubois went in search of a better life and got in over his head becomes, at once, a visionary epic about innocence and evil and a shattering dissection of contemporary American life.

At 30, Bob Dubois has a wife whom he loves, two daughters and another child on the way. All his life, he's lived in Catamount, New Hampshire, and since high school he's worked as a repairman for the Abenaki Oil Co. "He stays honest, he doesn't sneak copper tubing or tools into his car at night, he doesn't put in for time he didn't work, he doesn't drink on the job." He owns a run-down duplex in a working-class neighborhood, a 13-foot Boston whaler he built from a kit, and a battered Chevrolet station wagon, and he owes the local savings and loan—for the house, the boat and the car—a little over \$22,000. "We have a good life. We do," his wife, Elaine, keeps

Although Catamount may, at first, recall Bedford Falls, the setting of "It's a Wonderful Life," that surface image soon dissolves into another — an image more reminiscent of an Edward Hopper painting. There's something somber, depressed and even vaguely menacing about this community "closed in by weather and geography, where the men work at jobs and the women work at home and raise children and there's never enough money," where "the men and the women tend to feel angry toward one another much of the time, especially in the evenings when the work is done and the children are sleeping and nothing seems improved over yesterday."

Bob is no exception. Never having really grown up, Bob finds it hard to know right from wrong; instead, 'he relies on taboos and cir-cumstances to control his behavior, to make him a 'good man' — and lately, he's begun to feel even more confused and disconnected. He hates his humdrum life, feels trapped and angry that none of the dreams he grew up with are kely to come true. He feels there are two Bob likely to come true. He reets there are two Bob Duboises: the version he's invented for the real world —a man "who's dutiful, prudent, custodial, faithful and even-tempered;" and another, secret self — a man who's "feckless, reckless, irresponsible, faithless and irrational."

So far, there's not much to distinguish Bob Dubois from the host of disaffected characters.

Dubois from the host of disaffected characters who people the fiction of Raymond Carver, Bobbie Ann Mason and Mary Robison: not-so-young survivors of the dislocations of the dislocations of the 60s, afflicted with vague existential doubts and given to drifting, absentmindedly, from day to day. Bob, however, determines to try to day to day. Bob, however, determines at any make a new life for himself — to start again; and one fine day, he abruptly picks up his family and moves to Florida, where he's soon drawn into partnership with his fast-talking brother, Eddie, and with Ave, a childhood pal who's making a bundle running drugs.

For Banks, Florida is what California used to be Florida in the California used.

to be for Raymond Chandler and Nathanael West — a seedy, dangerous place, a magnet for dreamers, entrepreneurs and people with no place else to go. It's the final frontier, where all that's left of the old pioneer spirit is a sort of lawlessness and "me-first" individualism, where those willing to play fast and dirty can get rich quick but where other, more tentative folk, like Bob Dubois, see their dreams disintegrating in damp, pastel-colored trailer parks. Bob, in fact, discovers that his life has skidded out of control in Florida. By moving there, he hasn't lassoed the bright future he fantasized about; he's only succeeded in losing his past the job, the house, everything that once gave his life a modicum of coherence and meaning.

To refugees from the Caribbean, however, Florida still represents the promised land, the tip of the American dream, its palm trees whispering "luxury and power." And in a series of alternating takes that counterpoint the story of Bob Dubois, Banks tells the tale of a young Haitian woman named Vanise, who literally risks everything to get to Miami. Be-cause Vanise's inner life is never delineated with the care lavished on Bob's, the reader sometimes feels the author straining to use her as a metaphor for the yet unspoiled immigrant dream. All the same, the collision between her life and Bob's is so powerfully orchestrated that it takes on the terrible inevitablity of real life, and it lingers in our mind long after we finish the novel.

One of the reasons "Continental Drift" possesses such emotional resonance is that Banks makes the tenuousness of contemporary life our fears of not being able to hold onto our dreams and protect the people we love — seen entirely palpable, a hyproduct of our individ-ual failings and our susceptibility to all the changes wrought by recent history's manic metabolic rate. While the scope of "Continental Drift" is huge — the author wants to do nothing less than capture American life as it exists today — it remains, somebow, acutely personal; in the story of Bob Dubois's sad brief life, we catch a frightening glimpse of our own mortality.

SPORTS

Flyers Biggest Threat to Oiler Supremacy

By Sam McManis

Los Angeles Times Service EDMONTON, Alberta — More than just the Stanley Cup seemed to have changed hands last spring when the Edmonton Oilers dethroned the four-time defending champion New York Islanders in the National Hockey League championship series.

It seemed hockey itself would undergo a drastic change in style, as one dynasty gave way to one well on its way. Edmonton's convincing five-game victory was a triumph of speed and finesse over the bumpand-grind game that had made the Islanders and others so successful over the years.

The sleek, it appeared, were about to inherit the ice. Yet here it is the start of the 1984-85 playoffs, and that hasn't happened. The Oilers may not be the dynastic force they seemed after last season, and most of their challengers have not really changed

hockey. Since it holds the cup and still has the prolific Wayne Gretzky, Edmonton is the logical choice to repeat. But unlike recent seasons. there are several teams that could win the championship.

Any of three Adams Division exposed. The Caps rely almost strictly on Mike Gartner (102 teams — Montreal, Quebec and points) and Bobby Carpenter (95)

ADAMS DIVISION This group produced the most suspense during the regular season, and the first two rounds of the playoffs also should be close.

Montreal swept Boston in the first round last year, when the roles were reversed — the Bruins had finished first and the Canadiens fourth. The Canadiens seem to have enough offensive firepower to win, but their young defense may break down in later rounds.

Quebec has a goaltending prob-lem: Richard Sevigny was bombed in a 7-2 loss to Montreal last week, Dan Bouchard has been a disappointment all year and Mario Gosselin is a rookie. The Nordiques have an explosive offense, however, led by the line of Peter Stastny, Anton Stastny and Michel Goulet. But Buffalo has the division's best defense and goaltender, Tom Bar-rasso. If the Sabres can muster enough offense, they can beat the Nordiques and the Canadiens. SMYTHE DIVISION

Although Edmonton breezed through the regular season, their task won't be that casy in the playoffs. Last spring, Calgary took the Oilers to seven games in the second round before the Oilers overcame a third-period deficit and won a sries that was dubbed The Battle of Alberta. There will be a sequel if the Oilers beat Los Angeles, as exected, and the Flames get past Winnipeg in the first round.

Pelle Lindbergh's standout goaltending has been a major reason for the Flyers' success under rookie Coach Mike Keenan.

Mets 6, Cardinals 5

In the National League, in New in a New York uniform a memorable one by hitting a one-out home run off Neil Allen in the 10th to give the Mets a 6-5 victory over St. Louis. Carter, an All-Star acquired from Montreal in the off-season. went 2-for-4 and twice was hit by pitches. It was New York's l0th opening-day triumph in 11 years. Jack Clark, an off-season acqui-

sition of the Cardinals, homered and also drove in the tying run in the ninth, when he drew a bases-loaded walk from reliever Doug hitter. "But he made the transition Sisk. Dwight Gooden, the league's from power to linesse pitcher. He rookie of the year last season, startused to throw a straight fastball ed for the Mets and went six inCubs 2, Pirates 1

In Chicago, Rick Sutcliffe and and Keith Moreland drove in two runs to lift the Cubs over Pittsburgh, 2-1. Sutcliffe, last year's Cy

Gary Carter

chise record by winning his 15th straight game over two years; Ed Reulbach won 14 straight for the Cubs in 1909. Moreland had a runscoring single in the first and homered off Rick Rhoden to lead off the fourth.

Giants 4, Padres 3

Grants 4, Padres 3

delivered a one-out RBI single in the ninth to give the Giants a 4-3 verdict over San Diego. Brown's hit made a winner of veteran Vida Blue for the first time single 1983 Blue for the first time since 1982, Lemieux, Pinsburgh Blue for the first time since 1982.
Blue, out of baseball for over a year after a drug conviction, entered the game in the ninth and squelched an uprising after the Padres had tied, 2.2 laft I general started the San it 3-3. Jeff Leonard started the San Corponter, Washington Francisco ninth with a single off reliever Luis Del eon and moved to second on a sacrifice by Bob Brenly Kerr, Philodelphia before Brown laced his game-win-Goulet. Quebec ner hit to left.

Braves 6, Phillies 0

In Philadelphia, starter Rick Mahler pitched seven innings and Dale Murphy drove in two runs with two singles to spark Atlanta's 6-0 triumph over the Phillies, Mah-Tronter, N.Y.I. 6-0 triumph over the Phillies. Mah-Eddie Haas, the Braves' new man- Kurrl Edmont ager, notch his first major-league Gormer, Woshik victory.

Astros 2, Dodgers 1

In Houston, Nolan Ryan and Frank DiPino combined on a four-Gortner, Washing hitter to lead the Astros past Los Angeles, 2-1. Ryan retired 16 of 17 batters from the second inning through the seventh, after which DiPino came on. Ryan struck out four batters to increase his all-time leading total to 3,878, three ahead of Philadelphia's Steve Carlton. The victory was Houston's first on

Cavs Win Playoff Berth For First Time Since '78

Compiled by Our Staff From Dispasches George Karl began his first season Utah 123, Los Angeles Clippers as coach of the Cleveland Cavaliers 104; Los Angeles Lakers 148, Denby going 2-19, he had sunk about as ver 119, and Portland 116, Phoenix low as one could get. But when the 100. final buzzer sounded here Tuesday night. Karl was lifted high upon the points in the second quarter, but shoulders of his players and carried fell behind, 62-52, at halftime as shoulders of his players and carried off the court in triumph.

New Jersey sent the Cavaliers into

NBA FOCUS the National Basketball Association playoffs for the first time since

"I just hope everybody understands what a tremendous, great effort this was," said Karl, riding Roy Hinson's shoulders and basking in the cheers from a crowd of "It's a special feeling. But it was

World B. Free agreed. "We had world 8. Free agreed. We ame help from God," said the Cavaliers' jumper to give Cleveland the lead veteran guard, who scored a game-high 35 points. "Amazing I'm "When World hit that spinning "When World hit that spinning "The said the lead for good, 97-95." high 35 points. "Amazing I'm speechless I can't remember the

last time that happened." "We're not used to seeing a crowd like this here," said Net forward Albert King of the often nearempty Richfield Coliscum.

Tuesday's victory was a microcosm of Cleveland's season. The Cavaliers rallied from far behind in the second half, outscoring the Nets by 56-28 after trailing, 72-58, in the third period.

"That shows you the character of the team we have," said Free. "If you can set down by the character of the team we have," said Free. "If you can get down by 14 points and still make a run at a 500 team, that shows the character of your team." Elsewhere it was Washington 130, Atlanta 110; Philadelphia 113,

las 105; Houston 124, San Antonio RICHFIELD, Ohio - When 103; Detroit 107, New York 97; The Cavs led by as many as six

Micheal Ray Richardson scored 20 Cleveland's 114-100 victory over points in the first two periods. The Nets expanded the lead to 72-58 early in the third quarter be-fore Free scored 13 third-quarter points to pull the Cavaliers within

85-83 entering the final period. Phil Hubbard bad 8 points in a decisive 10-0 fourth-quarter burst that enabled Cleveland to secure the eighth and final playoff berth in the Eastern Conference (Cleveland will probably meet defending NBA mpion Boston in a best-of-five

first round playoff). With New Jersey ahead, 95-91, luck this year; next year we'll really Hubbard hit two straight lay-ups to tie the score with 6:08 left. After tie the score with 6:08 left. After the Nets' Buck Williams fouled out with 5:45 left, Free sank a 12-foot

shot at the top of the key, I thought we had a real chance to win it," said Karl "That sort of broke their backs." "We just regrouped our offense,"

22 points. "George got us together and told us to stop playing like passies. He got us mad, and we took it out on the Nets." New Jersey, paced by Richard-son's 33 points, fell to 39-40. "I had to sweat a full 48 minutes for those

said Hubbard, who finished with

the Cavs will give Boston a tough "Free and Hubbard just de-Boston 104; Kansas City 117, Dal- stroyed us." (UPI, AP)

points," said Richardson. "This

isn't a prediction, but you watch -

SPORTS BRIEFS

NEW ORLEANS (AP) - Two Tulane students have pleaded guilty to

with Memphis State.

Bobby Thompson, 21, of New Orleans, a member of the Tulane team, and David Rothenberg. 22, of Wilton, Connecticut, entered the pleas Tuesday as part of an agreement to cooperate with the district attorney. Thompson pleaded guilty to one count of conspiracy to commit sports

violations at Tulane, the resignations of Coach Ned Fowler and two assistants and to the school's announcing it intends to drop its basketball

witness against others in the case. Flamingo Disqualification Overturned

Division of Pari-Mutuel Wagering ordered a hearing after Chief's Crown's ownership protested the decision, and the panel of retired stewards ruled Tuesday that nothing that happened during the race

Stephan's Odyssey third. The first-place purse of \$150,000, withheld because of the protest, will be awarded to Chief's Crown. Under Florida racing laws, purses may be redistributed, but bettors have no recourse because the payoff already has been awarded.

CINCINNATI (AP) — Baseball Commissioner Peter Ueberroth says he does not consider any U.S. city currently suitable as a site for an expansion baseball franchise. Ueberroth said Monday that he has three criteria for expansion. "No. 1, that ownership has roots in the community; No. 2, that the

Officials in several cities, notably Denver, have made efforts to try to bring major league baseball teams to their cities. But Ueberroth said Tuesday that Denver would be in the tunning, "along with other interested cities," when expansion sites are considered.

2 Students Plead Guilty in Tulane Case

conspiring to bribe players to shave points in a Feb. 20 basketball game

bribery, Rothenberg to two counts of conspiracy and one count of possession of cocaine. Criminal District Judge Alvin Oser set July 9 for sentencing.

Rothenberg and Thompson are two of the eight men — three basketball players, three students and two nonstudents - accused of a scorefixing scheme. The investigation has led to the discovery of recruiting

His attorney said Rothenberg would "testify to the truth" if called as a Tuesday's Line Scores

HIALEAH, Florida (AP) — Chief's Crown, stripped of first place in the March 30 Flamingo Stakes, was reinstated Tuesday by a select panel that ruled unanimously that the colt did not interfere with second-place finisher Proud Truth. Chief's Crown, the early favorite for the Kentucky Derby on May 4 won the Flamingo by a length, but track stewards dropped him to second for moving into the path of Proud Truth during the stretch run. Florida's

merited disqualification. The panel also wiped out a 10-day suspension given to jockey Don MacBeth for his handling of Chief's Crown in the race. The final result shows Chief's Crown first, Proud Truth second and

ART BUCHWALD

It Was His Day Off

Editors is holding its annual convention in town this week and, as usual, everyone is overjoyed to see

What, you may ask, do highthese powered news-paper editors do when they aren't stroking each other at an editors' conven-

Everyone seems to have Buchwald his or her own idea. Here are some varied impressions, which depend on where you

The Editor (as he sees himself): A slightly aging Robert Redford, maybe five pounds overweight. It wasn't his choice, but someone has to be the "captain of the ship." It's lonely at the top. God, is it lonely on the top! You don't know who your real friends are anymore. Because you're tough but fair, you're always getting a bad rap. The editorial staff thinks you're constantly knuckling under to the business side of the paper. And the business side is always giving you a hard time for wasting the paper's valuable space on editorial content. They can't pay you enough for the aggravation you take. You'd go back to the police beat tomorrow if you could just keep your present salary and still eat in the executive

The Editor (as seen by his wife): She never sees him, except at 2 in the morning when she wakes to hand him the phone.

dining room.

The Editor (as seen by the report-er): Editors have two heads, no heart and eyes in the back of their pointy heads. For some reason. which the reporter can't fathom, the editor either ignores the reporter all the time or is constantly on his or her back. The editor has his

Everest Permit to Cost More

The Associated Press KATMANDU, Nepal - The Nepalese government is raising the cost of permits to climb Mount Everest and other Nepalese mountains starting July 15. A permit to climb Everest, the world's tallest peak, will cost \$2,573.

WASHINGTON—The Amerfavorites and assigns them the best
stories. He wouldn't recognize real talent if it was staring him in the face. The best way to keep your job is to have as few dealings with him as you possibly can. Editors used to tear up your story with a black crayon in front of your eyes - now they do it on the computer in their

office, and there's nothing you can

do but stare at the monitor and

bash your head against the screen. The Editor (as seen by the reader): Wears shirtsleeves in the office and polyester suits with unmatched pants and jackets to dinner parties. Either looks like Jason Robards or Ed Asner, depending on whether you saw "All the President's Men" or watched "Lou Grant" on television. He is responsible for all the bad news in the paper, especially the unfair and libelous articles about the reader's (a) political party. (b) religious affiliation or (c) favorite sports team. The editor is held accountable not only for printing the news but also for the news itself. He has too much power

down to size. The Editor (as seen by the publisher): Never is around when there is a crisis. Is responsible for \$4 million in libel suits now pending in courts. not to mention the legal fees the paper will have to pay, win or lose. The editor's entire operation is a drain on the paper's finances. All he wants to do is spend money that isn't his and print news that nobody wants to read. Has no sense of how much flak the publisher has to take from his friends and business associates for some stupid story the editor let through.

and you can't wait to see him cut

The Editor (as seen by the syndicated columnist who appears in his paper): Forthright, brave, intelli-gent and honorable, the editor is not only a credit to his profession and his race, but the one indispensable person in a free and thriving democratic society.

His main job is to make crucial decisions. For example, this article may have been submitted to him and he had to decide whether it should appear in a family newspa-

If the editor said, "No way," then you wouldn't be reading it right now. But since you're reading it, you have to assume one of two things. Your paper has an editor with a sense of humor, or yesterday was his day off.

Neil Simon's Youth: The Biloxi Scene

By Michiko Kakutani New York Times Service

EW YORK — In "Bilox NEW YORK — L. Blues," Neil Simon's new hit on Broadway, it is 1943, and Eugene Morris Jerome, the young hero played by Matthew Broderick, is spending his stint in the wartime army, trying to grow up and become a writer.

Eugene sees himself as an outsider, an invisible witness to the hectic events of the world around him, and he is constantly scribbling down his observations of his fellow soldiers in a little marbled-cover composition book, feeling "a little ashamed for betraying their secret and private thoughts." Instead of serving on the battlefield, he will go on to work for a GI newspaper, but while this will cause him to "suffer pangs of guilt because my career was enhanced by World War II," he will have found his vocation. He will indeed grow up and become a writer. He will grow up and become Neil Simon.

Like François Truffaut's Antoine Doinel, like Tennessee Williams's Tom Wingfield, Eugene is intended as a portrait of the author as a young man. Yet if many of the events and emotions in 'Biloxi Blues" and its companion piece, "Brighton Beach Memoirs," were taken from Simon's life — the job on a service newspaper, a humiliating experience with prejudice in the army, a very funny encounter with a prostitute they are also the efforts of a mature writer, in the playwright's words, to "force memory" and in doing so, recapture and reassess

"I think you discover things by writing — it can be therapeutic. Simon said, "and I wanted to know how this extremely shy, not enormously well-educated boy came to do what I consider a very bard thing to do: write plays. I wanted to see how I became the

The acclaim that his 22 plays and more than a dozen movies have given him. Simon said, has done much to alleviate his shy-ness and diminish his sense of invisibility, but at 57, he continues to have a lot in common with this younger self he calls Eugene
— a name chosen for its ethnic

Simon (right), Broderick and Gene Saks, the director.

mean "you're never going to play on the Yankees."

As a young boy, whose parents were constantly fighting, Simon used to sit alone in the dark in his room, listening to the radio, removing "reality and replacing it with my dreams"; and to this day. he still loves to retreat to the private world of his imagination. Like Eugene, he still chastises himself for being a witness and not taking a more active part in the world; and like Eugene, he still loves the actual process of writing and the pleasures it affords. The lovely, tactile sense of filling up thinly lined notebooks with prose; the cathartic release of expressing — or confessing — unconscious thoughts through surrogate spokesmen; the selfknowledge gained by reinventing

the past through words. In a sense, Simon's best work has always been acutely autobiographical —either translations of his experiences or wished-for scenarios played out on the stage or screen. He will occasionally write something wholly diversionary like "Murder by Death" to take a trouble when he's strayed into unfamiliar territory, as he did with "The Star-Spangled Girl." a comedy about two leftist politicos who fall in love with a reactionary girl.

Simon's first play, "Come Blow Your Horn," portrayed the efforts of himself and his brother to leave home. "Barefoot in the Park" commemorated his early years of marriage to his first wife. Joan; and "Chapter Two" dealt with the guilt he felt after her death in 1973. "The Odd Couple" was based on the experiences of Simon's brother, Danny, and a friend, and "The Sunshine Boys." on older comics he knew from his days as a gag writer.

Curiously enough, Simon re-fers to all the fictionalized versions of himself as "Eugene," as though his ocuvre formed a single, continuons memoir — "when I started writing about Eugene he was 21 in Come Blow Your Horn,' and in 'Barefoot in the Park,' Eugene was 26 or 27" and he points out that these characters all share "my humor, my attitude in dealing with things. As he's gotten older, though, he says his perspective has become part of me."

clearer, and a change, too, has taken place in his treatment of "Eugene": Whereas the early plays treated the "lighter, farcical sides of the hero and his dilemmas, the last two works have used humor to explore

somewhat darker regions.

In "Brighton Beach," Simon says, he tried to deal with the fact that his mother was a wonderful woman who also happened to be a bigot. He is currently thinking about writing a third play about Eugene's apprenticeship as a writer—a play that would be set during the years he worked for television with Carl Reiner. Sid Caesar and Phil Silvers. The role of Eugene, in all likelihood, would again be played by Matthew Broderick

In playing Eugene twice al-ready, Broderick has not only been re-enacting Simon's coming of age as a writer, but has also been growing up in front of audiences himself: He was 21 when he got the part in "Brighton Beach"; last month be turned 23. "Brighton Beach," of course, was the show that galvanized his career - since then, he's made such movies as "WarGames" and "Max Dugan Returns."

"I went through a long time of dying to be an actor," he said, recalling his days as a young teen-ager at the Walden School. "But I was afraid to get in front of people. I'd picked a school that had a great theater, but it took two years for me to audition."

As played by Broderick, Eugene seems the model image of a young writer or what an older writer would like to remember his younger self as --- vulnerable but spirited, appealing in his good-natured idealism; and when Simon sees him on the stage, he can't help but be reminded of the young man he used to be.

"It's not physical so much," be says, "but that Matthew says so many of the things exactly the I would say them. I think also it's the way he does the humor — he never tries to be funny; he says the lines with great earnestness. Somehow I would not feel I'd quite accomplished my job fully if he were the only one who could play the role, but it's hard to escape Matthew's craftsmanship and charm. There's an

Mercouri's Piraeus Plan

Melina Mercouri, the culture minister of Greece, has announced plans for a \$700,000 permanent exhibit in Athens's port city of Piracus illustrating Greece's seafaring tradition. "Greece has always lived by the sea and from the sea. This exhibit will make Piraeus rate with Europe's richest cultural centers." she said. Mercouri, who is well known for her portrayal of a Piracus waterfront prostitute in the film "Never on Sunday," represents a Piraeus district in Parliament. The exhibit to open June 21 at Piraeus's central passenger terminal, will include more than 1,600 items from the Stone Age to modern times.

The man who played the part of Christ in the Oberammergau passion play has been denied recognition as a conscientious objector. A West German selective service board ruled Tuesday that Rudi Zwink, 26, a dentistry student, must serve 15 months in the West German Army. Zwink said as both a Christian and as "Christ" in the play, staged in Oberammergau since 1634, he did not want to become a soldier. Zwink said be would appeal the decision. In 1984, 23,929 men applied for exemption. Of these only 2,248 were rejected.

"We Are the World," the U.S. charity album to fight hunger in Africa and America, started at No. 9 on Billboard magazine's pop al-bums chart. Tom Noonan, an editor at Billboard, said the last previous album to debut at No. 9 was Bruce Springsteen's "Born in the USA," in June 1984. That album quickly went to No. 1, and "hasn't been out of the top four for 44 weeks." Noonan said. . . . International stars such as Menudo, Julio Iglesias and Ricardo Montalban donated their talents Tuesday to a Latin song similar to "We Are the World" to help the needy in Latin

America and Africa. The singer Vicki Carr, one of 48 artists who participated in the recording session at A&M Studios in Los Angeles, said she was glad the record was being produced, "knowing that in Latin America especially so much help is needed." Ninety percent of the profits were to go to Latin American relief, with the rest targeted for Africa. Among the art-

comedy team Cheech and Chong Apollonia, Jose Feliciano, Sergio Mendez, the Mexican singer José José, the Venezuelan singer José Luis Rodriquez and the Mexican comedian Cantinflas. Artists who sent tapes to be spliced in included the opera singer Placido Domingo and the singer Irene Cara. Austrian pop stars announced Wednesday they had written and recorded a song about the famine in Ethiopia and said profits from sales would go toward helping hunger victims there. Called "Warum" (Why), the song features Wolfgang Ambros, Ulli Baer, Maria Bill, Pe-ter Cornelius, Georg Danzer, An-dré Heller and others.

Cicely Tyson says that she re-

feeth of the

gretted having to take action against a theater group created by Elizabeth Taylor and the producer Zev Bufman, but she is pleased with the outcome. Richard G. Green, an arbitrator in New York, ordered the Elizabeth Theatre Group to pay Tyson back wages of \$607,078 since her firing from the cast of "The Corn Is Green" on Sept. 16, 1983. Tyson's manager said Tuesday. The company fired Tyson atter two weeks of Broadway performances, alleging that she failed to tell management she could not ap-pear one night and that she refused to take direction from the play's director. An airline flight delay caused Tyson to miss one performance, her manager said. Taylor's spokeswoman said Tuesday that Taylor has nothing to do with (the dispute]. It's between Mr. Bufman and Miss Tyson."

Romusid Spasowski, 64, an am-bassador to the United States when he defected in 1981 after the imposition of martial law in Poland, was baptized and confirmed a Roman Catholic during a Mass at the home of Cardinal John Krol in Philadelphia. Spasowski, a lifelong atheist, said his decision to join the church was the result of a "growing inner life" and called his baptism "the happiest moment of his life. I feel that I have joined, really, also the Polish people." Spasowski's wife, Wanda, is a Catholic. Spasowski, who served as ambassador from 1955 to 1961 and from 1978 to ists who sang at the session were 1981, was Poland's senior diplomat Richard (Cheech) Marin of the when he defected on Dec. 21, 1981.
